Clark Atlanta University Thomas W. Cole Jr. 2013-11-07 This book is the story of how events, timing, relationships and people of goodwill converged at a particular moment in time to achieve a vision for Atlanta University, Clark College and for American higher education that many predicted was not possible in the Atlanta University Center. It describes the formation and development of the consolidated institution from 1988 to 2002 and the historical context that made it possible for two independent institutions with proud histories and legacies of over 100 years each to consolidate. A careful, strategic and deliberate planning process, endorsed by both boards of trustees, is outlined which created the only exclusively private, comprehensive historically black university in the Nation with academic programs of study and research from the freshman year through the doctorate.

Building Academic Vocabulary Robert J. Marzano 2006-12-01 In Building Academic Vocabulary: Teacher's Manual, Robert J. Marzano and Debra J. Pickering give teachers a practical way to help students master academic vocabulary. Research has shown that when teachers, schools, and districts take a systematic approach to helping students identify and master essential vocabulary and concepts of a given subject area, student comprehension and achievement rises. In the manual, readers will find the following tools: * A method to help teachers, schools, and districts determine which academic vocabulary terms are most essential for their needs * A six-step process for direct instruction in subject area vocabulary * A how-to to help students use the Building Academic Vocabulary: Student Notebook. The six-step method encourages students to learn critical academic vocabulary by connecting these terms to prior knowledge using linguistic and non-linguistic means that further encourage the refinement and deepening of their understanding. * Suggestions for tailoring academic vocabulary procedures for English Language Learners. * Samples and blackline masters for a variety of review activities and games that reinforce and refine student understanding of the academic terms and concepts they learn. The book also includes a list of 7,923 vocabulary terms culled from the national standards documents and other publications, organized into 11 subject areas and 4 grade-level categories. Building Academic Vocabulary: Teacher's Manual puts into

practice the research and ideas outlined in Marzano's previous book *Building Background Knowledge for Academic Achievement*. The Honest Truth About Dishonesty Dr. Dan Ariely 2013-06-18 "A lively tour through the impulses that cause many of us to cheat, the book offers especially keen insights into the ways in which we cut corners while still thinking of ourselves as moral people." — Time Dan Ariely, behavioral economist and New York Times bestselling author of *Predictably Irrational* and *The Upside of Irrationality*, returns with a thought-provoking work that challenges our preconceptions about dishonesty and urges us to take an honest look at ourselves. Does the chance of getting caught affect how likely we are to cheat? How do companies pave the way for dishonesty? Does collaboration make us more or less honest? Does religion improve our honesty? Most of us think of ourselves as honest, but, in fact, we all cheat. From Washington to Wall Street, the classroom to the workplace, unethical behavior is everywhere. None of us is immune, whether it's a white lie to head off trouble or padding our expense reports. In *The (Honest) Truth About Dishonesty*, award-winning author Dan Ariely shows why some things are easier to lie about than others; how getting caught matters less than we think in whether we cheat; and how business practices pave the way for unethical behavior, both intentionally and unintentionally. Ariely explores how unethical behavior works in the personal, professional, and political worlds, and how it affects all of us, even as we think of ourselves as having high moral standards. But all is not lost. Ariely also identifies what keeps us honest, pointing the way for achieving higher ethics in our everyday lives. With compelling personal and academic findings, *The (Honest) Truth About Dishonesty* will change the way we see ourselves, our actions, and others.

The Constitution of Algorithms Florian Jatton 2021-04-27 A laboratory study that investigates how algorithms come into existence. Algorithms--often associated with the terms big data, machine learning, or artificial intelligence--underlie the technologies we use every day, and disputes over the consequences, actual or potential, of new algorithms arise regularly. In this book, Florian Jatton offers a new way to study computerized methods, providing an account of where algorithms come from and how they are constituted, investigating the practical activities by which algorithms are progressively assembled rather than what they may suggest or require once they are assembled.

Your Money, Your Goals Consumer Financial Protection Bureau 2015-03-18 Welcome to the Consumer Financial Protection Bureau's Your Money, Your Goals: A financial empowerment toolkit for social services programs! If you're reading this, you are probably a case manager, or you work with case managers. Finances affect nearly every aspect of life in the United States. But many people feel overwhelmed by their financial situations, and they don't know where to go for help. As a case manager, you're in a unique position to provide that help. Clients already know you and trust you, and in many cases, they're already sharing financial and other personal information with you. The financial stresses your clients face may interfere with their progress toward other goals, and providing financial empowerment information and tools is a natural extension of what you are already doing. What is "financial empowerment" and how is it different from financial education or financial literacy? Financial education is a strategy that provides people with financial knowledge, skills, and resources so they can get, manage, and use their money to achieve their goals. Financial education is about building an individual's knowledge, skills, and capacity to use resources and tools, including financial products and services. Financial education leads to financial literacy. Financial empowerment includes financial education and financial literacy, but it is focused both on building the ability of individuals to manage money and use financial services and on providing access to products that work for them. Financially empowered individuals are informed and skilled; they know where to get help with their financial challenges. This sense of empowerment can build confidence that they can effectively use their financial knowledge, skills, and resources to reach their goals. We designed this toolkit to help you help your clients become financially empowered consumers. This financial empowerment toolkit is different from a financial education curriculum. With a curriculum, you are generally expected to work through most or all of the material in the order presented to achieve a specific set of objectives. This toolkit is a collection of important financial empowerment information and tools you can access as needed based on the client's goals. In other words, the aim is not to cover all of the information and tools in the toolkit - it is to identify and use the information and tools that are best suited to help your clients reach their goals.
