**Rift-lines Within European Regulatory Framework for Biosimilars when Taking**

## **Heterogeneity and Variation During Lifecycle of the Reference Biologic and the Biosimilar Into Account**

Malik Osmane 2014

Biopharmaceutical medicinal products (biologics) represent a huge financial market. Thus upon patent protection expiry of the innovator (reference) biologic there is interest from industry to gain a portion of this market by launching a 'similar' biologic at a reduced development cost, thus boosting potential gains. The EMA responded to this desire and lead the guidance process with industry on the topic of biosimilars. Based on the experience gained with biosimilars in the past, the EMA started to introduce a second generation series of guidance documents, which take into account the past, current and possibly future challenges of biosimilars. Those proposals were evaluated by EMA and partially incorporated into new guidance documents. This work highlights the challenges and risks associated with biosimilar

submissions for large and complex bio-molecules such antibodies. Results: There are unaddressed questions for the regulator with regard to the unsolved dynamic of heterogeneity and variations of the quality profile, which have potential implications on safety and efficacy. This is neglected and not taken into account seriously enough by the stakeholders. Solution: Further, the only (in my view) progressive way to deal with such foreseeable situations from the biosimilar developer's point of view is to incorporate a design space.

**AMA Research Study 1960 Neurocritical Care Board Review** Asma Zakaria, MD 2018-12-20 Updated and expanded second edition of the singular review source for neurocritical care boards, this book contains multiple-choice questions that cover the breadth of topics tested on the boards with answers and rationales for self-study. The book has been completely and thoroughly revised to reflect the requirements for initial certification or recertification in Neurocritical Care with the latest findings of the most recent clinical trials in vascular neurology, neurocritical care, and critical care medicine incorporated. Organized to reflect the training curriculum and exam blueprint, the second edition now contains 740 questions addressing both neuroscience critical care and general critical care core knowledge. Detailed explanations are provided for each question along with

references for further study. Case questions with angiograms, EEG and monitoring waveforms, CT perfusion scans, and other images allow candidates to familiarize themselves with these tools that form a significant part of the exam. This book is an excellent resource not only for board preparation but for topical review for residents and fellows from all disciplines of medicine rotating in the neurocritical care unit as it is easy to read, concise, and portable with case examples and imaging to further guide education. Trainees taking the surgical or medicine critical care boards will also find it useful as it covers the neurocritical care component of their board curriculums. Key Features: Second edition of the first dedicated review book available for neurocritical care boards Over 90 entirely new questions added to ensure coverage of the full range of topics tested on boards and essential to training in neurocritical care Revised and

updated questions, answers, and references to reflect current science and practice Comprehensive high-yield review of both neurological and general critical care topics New chapter on critical care EEG and more image-based case questions to augment learning

*Civil Courts and the European Polity* Chantal Mak 2023-07-13 The chapters collected in this book explore the place and role of judge-made private law in an emerging European polity. Examining case-law from the perspective of different theories and viewpoints, scholars and judges assess and reflect on the role of judges in civil cases for polity-building in Europe. The chapters thus present a kaleidoscopic view on the dynamics of private law adjudication against a European backdrop. The book aims to add a private legal perspective to existing discourses in European constitutional law on Europe's political constellation. It aspires to enrich two debates - the first on the influence of

fundamental rights in private legal relations, and the second on the constitutional dimension of European private law. The contributions are placed within a framework of five sub-categories or dimensions of judge-made European private law: politics of European private law adjudication, rights, remedies, representation and reflections of judges on specific cases.

**The Outer Limits of European Union Law**

Catherine Barnard 2009-03-05 A commonly expressed view is that the citizens and the Member States are destined to be overcome by the European Union. There is a sense that the Union of today is not what was intended to be created or acceded to by the Member States or its citizens. The Outer Limits of European Union Law brings together a diverse group of legal scholars to consider aspects of EU substantive, constitutional and procedural law in a manner highlighting the many senses in which the European Union is or can be limited and so demonstrating that the fear of being overcome is largely a false fear. By

exploring the mechanisms and devices used to limit the European Union, the contributors also reveal not only the strengths of the various limits, but also and more crucially the weakness of the limits, thereby demonstrating that the prospect of being overcome may be a genuine risk to be guarded against. By considering general themes (eg legitimacy) and core subject areas (eg policing, free movement of goods, remedies) the book reveals the various techniques used by the Court of Justice, Community institutions and Member States to define and modify the outer limits of the European Union and European Union Law.

### **Organisation and Management of Intensive Care**

D. Reis Miranda  
2012-12-06 From the viewpoint of a health economist, the intensive care unit (ICU) is a particularly fascinating phenomenon. It is the epitome of "high-tech" medicine and frequently portrayed as the place where life-saving miracles are routinely wrought. But the popular imagination is also caught up in the darker side, when agonizing decisions have to be made to avoid futile and inhuman continuation of expensive treatments. My analytical interests led me to approach these issues by asking what the evidence tells us about which ICU activities are very beneficial in relationship to their costs and which are not. This quickly translates into a slightly different question, namely, which patients are most appropriately treated in an ICU and which not. Unfortunately, it is very hard to answer these questions because it has pro

ved very difficult to investigate these issues in the manner which is now regarded as the "gold standard:" namely by conducting randomized clinical trials or alternative courses of action. I think this is a pity, and I am not at all convinced that it would be unethical to do so in many cases, because there is wide variation in practice and genuine doubt as to which practices are best -the two conditions that need to be fulfilled before such a trial is justifiable.

*European Union Politics*

Michelle Cini 2019 Subject:

"This sixth edition of 'European Union Politics' builds on the success of the previous five editions by retaining and updating the chapters published in the previous version of the book.

Innovations in this edition include a new chapter on Brexit and a section on the migration crisis in Chapter 22."
