Production-Ready

Microservices Susan J. Fowler

2016-11-30 One of the biggest challenges for organizations that have adopted microservice architecture is the lack of architectural, operational, and organizational standardization. After splitting a monolithic application or building a microservice ecosystem from scratch, many engineers are left wondering what's next. In this practical book, author Susan Fowler presents a set of microservice standards in depth, drawing from her experience standardizing over a thousand microservices at Uber. You'll learn how to design microservices that are stable, reliable, scalable, fault tolerant, performant, monitored, documented, and prepared for any catastrophe. Explore production-readiness standards, including: Stability and Reliability: develop, deploy, introduce, and deprecate microservices; protect against dependency failures Scalability and Performance: learn essential components for achieving greater microservice efficiency Fault Tolerance and

Catastrophe Preparedness: ensure availability by actively pushing microservices to fail in real time Monitoring: learn how to monitor, log, and display key metrics; establish alerting and on-call procedures Documentation and Understanding: mitigate tradeoffs that come with microservice adoption, including organizational sprawl and technical debt

The Adult Learner Malcolm S.

Knowles 2020-12-21 How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education

theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of The Adult Learner has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of The Adult Learner will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult

learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

Data Science for Economics and Finance Sergio Consoli

2021 This open access book covers the use of data science, including advanced machine learning, big data analytics, Semantic Web technologies, natural language processing, social media analysis, time series analysis, among others, for applications in economics and finance. In addition, it shows some successful applications of advanced data science solutions used to extract new knowledge from data in order to improve economic forecasting models. The book starts with an introduction on the use of data science technologies in economics and finance and is followed by thirteen chapters

showing success stories of the application of specific data science methodologies, touching on particular topics related to novel big data sources and technologies for economic analysis (e.g. social media and news); big data models leveraging on supervised/unsupervised (deep) machine learning; natural language processing to build economic and financial indicators; and forecasting and nowcasting of economic variables through time series analysis. This book is relevant to all stakeholders involved in digital and data-intensive research in economics and finance, helping them to understand the main opportunities and challenges, become familiar with the latest methodological findings, and learn how to use and evaluate the performances of novel tools and frameworks. It primarily targets data scientists and business analysts exploiting data science technologies, and it will also be a useful resource to research students in disciplines and courses related

to these topics. Overall, readers will learn modern and effective data science solutions to create tangible innovations for economic and financial applications.

Found Money Steve

Wilkinghoff 2009-08-24 A fresh perspective on what it takes to run a moneymaking small business If you're a small business owner, you probably started out with a great idea, an entrepreneurial dream, and the willingness to work as hard as you have to. You're up-and-running, your products and services are selling, and you are working as hard as you can. But where do you go from here? How do you get there? And how can you be sure your business will make you money now and for the long term?

Found Money presents a new and powerful approach to small-business success. It helps you figure out, instantly, whether your business is on-track or flying off the rails (and how to correct it if it is flying off the rails). Not only does it help you understand how your business makes you money, but

how to control that process as well. It offers accessible, easy-to-use tools and tactics to help you understand the links between what happens in your small business and the financial results you achieve so you can proactively create the financial results you want.

Helps you maximize the money your small business makes by showing you where additional profit and cash flow is hiding right now in your business Steve Wilkinghoff is an accountant and consultant who helps businesses reach their full, money-making potential Foreword by Michael Gerber, preeminent small business guru If you own your own small business but don't know how to take control of the financial results it gives you, Found Money hands you the strategies, tactics and tools you need to take control, and direct and maximize the money-making process.

Stop Spending, Start Managing Tanya Menon
2016-07-26 Stop Wasting Precious Time and Money You have a complex problem at

work, and you know the standard solutions: hire a consultant, enlist a superstar employee, have more meetings about it. In short, spend money and hours to dig your way out. But you've been down this road before—the so-called solution consumes your time, dollars, and resources, and yet the problem still reappears. There is a way out of this cycle. Organizational researchers Tanya Menon and Leigh Thompson, experts in collaboration and creativity, identify five spending traps that lead to this wasteful “action without traction”: The Expertise Trap: recycling old solutions on current problems The Winner's Trap: investing additional resources into failing projects The Agreement Trap: avoiding conflict to feel like a team player The Communication Trap: communicating too frequently over too many channels The Macromanagement Trap: assuming your employees don't need your direction Menon and Thompson combine their own research with other findings in

psychology to provide strategies to break these unproductive habits and refine your skills as a manager. From shaping problems in new ways and learning from failure through experimentation, to stimulating productive conflict and structuring coordinated conversations, you can escape these traps and discover the value hidden in your organization—without spending a dime.

Beating Bureaucracy in Special Educational Needs Jean Gross

2015-06-05 Are you overwhelmed by the amount of paperwork that SEN generates in your school? Would you like to spend more time actually improving the quality of teaching and learning for pupils with SEN or disabilities? If so, this is an essential book for you. Fully revised and updated for the 2014 SEN Code of Practice, this new edition contains strategies for reducing the number of individual education plans and review meetings. *Beating Bureaucracy in Special Educational Needs* will help

you to use existing systems for target setting, recording and planning – personalised systems that are used for all children as part of everyday teaching practices. It lists the intervention programmes that really work and showcases the work of four schools that have successfully developed ways of planning provision, working with parents, and supporting staff development. Ready-to-use proforma in the book are also available online, and include a model policy for Ofsted; strategy sheets for all main types of SEN; provision maps and proformas to help you plan, monitor and evaluate your provision *Beating Bureaucracy in Special Educational Needs* will provide support for school leaders, SENCOs and anyone undertaking the national SENCO award. A practical and engaging guide, this new and updated edition shows how to put responsibility for supporting children with most types of additional need firmly back where it belongs – with class and subject teachers. It

will help you - in the words of one SENCO - 'get your life back'.

The Great Game of Business
Jack Stack 1994 The Great Game of Business started a business revolution by introducing the world to open-book management, a new way of running a business that created unprecedented profit and employee engagement. The revised and updated edition of *The Great Game of Business* lays out an entirely different way of running a company. It wasn't dreamed up in an executive think tank or an Ivy League business school or around the conference table by big-time consultants. It was forged on the factory floors of the heartland by ordinary folks hoping to figure out how to save their jobs when their parent company, International Harvester, went down the tubes. What these workers created was a revolutionary approach to management that has proven itself in every industry around the world for the past thirty years--an approach that is perhaps the

last, best hope for reviving the American Dream.

The Last Pirate

Tony Dokoupil 2015-01-06 A haunting and often hilarious memoir of growing up in 80s Miami as the son of Big Tony, a flawless model of the great American pot baron. To his fellow smugglers, Anthony Edward Dokoupil was the Old Man. He ran stateside operations for one of the largest marijuana rings of the twentieth century. In all they sold hundreds of thousands of pounds of marijuana, and Big Tony distributed at least fifty tons of it. To his son he was a rambling man who was also somehow a present father, a self-destructive addict who ruined everything but affection.

Here Tony Dokoupil blends superb reportage with searing personal memories, presenting a probing chronicle of pot-smoking, drug-taking America from the perspective of the generation that grew up in the aftermath of the Great Stoned Age.

Technology in Mathematics

Teaching Gilles Aldon

2019-07-01 This book comprises chapters featuring a state of the art of research on digital technology in mathematics education. The chapters are extended versions of a selection of papers from the Proceedings of the 13th International Conference on Technology in Mathematics Teaching (ICTMT-13), which was held in Lyon, France, from July 3rd to 6th. ICTMT-13 gathered together over one hundred participants from twenty countries sharing research and empirical results on the topical issues of technology and its potential to improve mathematics teaching and learning. The chapters are organised into 4 themed parts, namely assessment in

mathematics education and technology, which was the main focus of the conference, innovative technology and approaches to mathematics education, teacher education and professional development toward the technology use, and mathematics teaching and learning experiences with technology. In 13 chapters contained in the book, prominent mathematics educators from all over the world present the most recent theoretical and practical advances on these themes This book is of particular interest to researchers, teachers, teacher educators and other actors interested in digital technology in mathematics education.

The Millionaire Fastlane MJ

DeMarco 2011-01-04 10TH

ANNIVERSARY EDITION Is the financial plan of mediocrity -- a dream-stealing, soul-sucking dogma known as "The Slowlane" your plan for creating wealth? You know how it goes; it sounds a lil something like this: "Go to school, get a good job, save 10% of your paycheck, buy a

used car, cancel the movie channels, quit drinking expensive Starbucks mocha lattes, save and penny-pinch your life away, trust your life-savings to the stock market, and one day, when you are oh, say, 65 years old, you can retire rich." The mainstream financial gurus have sold you blindly down the river to a great financial gamble: You've been hoodwinked to believe that wealth can be created by recklessly trusting in the uncontrollable and unpredictable markets: the housing market, the stock market, and the job market. This impotent financial gamble dubiously promises wealth in a wheelchair -- sacrifice your adult life for a financial plan that reaps dividends in the twilight of life. Accept the Slowlane as your blueprint for wealth and your financial future will blow carelessly asunder on a sailboat of HOPE: HOPE you can find a job and keep it, HOPE the stock market doesn't tank, HOPE the economy rebounds, HOPE, HOPE, and HOPE. Do you

really want HOPE to be the centerpiece for your family's financial plan? Drive the Slowlane road and you will find your life deteriorate into a miserable exhibition about what you cannot do, versus what you can. For those who don't want a lifetime subscription to "settle-for-less" and a slight chance of elderly riches, there is an alternative; an expressway to extraordinary wealth that can burn a trail to financial independence faster than any road out there. Why jobs, 401(k)s, mutual funds, and 40-years of mindless frugality will never make you rich young. Why most entrepreneurs fail and how to immediately put the odds in your favor. The real law of wealth: Leverage this and wealth has no choice but to be magnetized to you. The leading cause of poorness: Change this and you change everything. How the rich really get rich - and no, it has nothing to do with a paycheck or a 401K match. Why the guru's grand deity - compound interest - is an impotent wealth

accelerator. Why the guru myth of "do what you love" will most likely keep you poor, not rich. And 250+ more poverty busting distinctions... Demand the Fastlane, an alternative road-to-wealth; one that actually ignites dreams and creates millionaires young, not old. Change lanes and find your explosive wealth accelerator. Hit the Fastlane, crack the code to wealth, and find out how to live rich for a lifetime.

Learn Better Ulrich Boser
2019-09-03 For centuries,

experts have argued that learning was about memorizing information: You're supposed to study facts, dates, and details; burn them into your memory; and then apply that knowledge at opportune times. But this approach to learning isn't nearly enough for the world that we live in today, and in *Learn Better* journalist and education researcher Ulrich Boser demonstrates that how we learn can matter just as much as what we learn. In this brilliantly researched book, Boser maps out the new science of learning, showing how simple techniques like comprehension check-ins and making material personally relatable can help people gain expertise in dramatically better ways. He covers six key steps to help you "learn how to learn," all illuminated with fascinating stories like how Jackson Pollock developed his unique painting style and why an ancient Japanese counting device allows kids to do math at superhuman speeds. Boser's witty, engaging writing makes this book feel like a guilty

pleasure, not homework. Learn Better will revolutionize the way students and society alike approach learning and makes the case that being smart is not an innate ability—learning is a skill everyone can master. With Boser as your guide, you will be able to fully capitalize on your brain's remarkable ability to gain new skills and open up a whole new world of possibilities.

The Total Money Makeover

Dave Ramsey 2009-12-29 The success stories speak for themselves in this book from money maestro Dave Ramsey. Instead of promising the normal dose of quick fixes, Ramsey offers a bold, no-nonsense approach to money matters, providing not only the how-to but also a grounded and uplifting hope for getting out of debt and achieving total financial health. Ramsey debunks the many myths of money (exposing the dangers of cash advance, rent-to-own, debt consolidation) and attacks the illusions and downright deceptions of the American dream, which encourages

nothing but overspending and massive amounts of debt. "Don't even consider keeping up with the Joneses," Ramsey declares in his typically candid style. "They're broke!" The Total Money Makeover isn't theory. It works every single time. It works because it is simple. It works because it gets to the heart of the money problems: you. This 3rd edition of The Total Money Makeover includes a fresh cover design, all new personal success stories, and naysayers, and more.

Hidden Financial Risk J. Edward Ketz 2003-08-08 An insider's guide to understanding and eliminating accounting fraud How do these high-profile accounting scandals occur and what could have been done to prevent them. Hidden Financial Risk fills that void by examining methods for off balance sheet accounting, with a particular emphasis on special purpose

entities (SPE), the accounting reuse of choice at Enron and other beleaguered companies. J. Edward Ketz identifies the incentives for managers to deceive investors and creditors about financial risk and also shows investors how to protect their investments in a world filled with accounting and auditing frauds. J. Edward Ketz, PhD (State College, PA) is MBA Faculty Director and Associate Professor of Accounting at Penn State's Smeal College of Business. He has been cited in the press nearly 300 times since Enron's bankruptcy, including The New York Times, The Wall Street Journal, and The Washington Post.. He has a regular column in Accounting Today.

Causal Inference Scott

Cunningham 2021-01-26 An accessible, contemporary introduction to the methods for determining cause and effect in the social sciences "Causation versus correlation has been the basis of arguments--economic and otherwise--since the beginning of time. Causal Inference: The Mixtape uses legit real-world examples that I found genuinely thought-provoking. It's rare that a book prompts readers to expand their outlook; this one did for me."--Marvin Young (Young MC) Causal inference

encompasses the tools that allow social scientists to determine what causes what. In a messy world, causal inference is what helps establish the causes and effects of the actions being studied--for example, the impact (or lack thereof) of increases in the minimum wage on employment, the effects of early childhood education on incarceration later in life, or the influence on economic growth of introducing malaria nets in developing regions. Scott Cunningham introduces students and practitioners to the methods necessary to arrive at meaningful answers to the questions of causation, using a range of modeling techniques and coding instructions for both the R and the Stata programming languages.

Life Insurance Mathematics

Hans U. Gerber 2013-11-11

From the reviews: "The highly esteemed 1990 first edition of this book now appears in a much expanded second edition. The difference between the first two English editions is

entirely due to the addition of numerous exercises. The result is a truly excellent book, balancing ideally between theory and practice. ...As already hinted at above, this book provides the ideal bridge between the classical (deterministic) life insurance theory and the emerging dynamic models based on stochastic processes and the modern theory of finance. The structure of the bridge is very solid, though at the same time pleasant to walk along. I have no doubt that Gerber's book will become the standard text for many years to come.

Mastering 'Metrics Joshua D.

Angrist 2014-12-21 An

accessible and fun guide to the essential tools of econometric research Applied econometrics, known to aficionados as 'metrics, is the original data science. 'Metrics encompasses the statistical methods economists use to untangle cause and effect in human affairs. Through accessible discussion and with a dose of kung fu-themed humor, Mastering 'Metrics presents the essential tools of econometric research and demonstrates why econometrics is exciting and useful. The five most valuable econometric methods, or what the authors call the Furious Five--random assignment, regression, instrumental variables, regression discontinuity designs, and

differences in differences--are illustrated through well-crafted real-world examples (vetted for awesomeness by Kung Fu Panda's Jade Palace). Does health insurance make you healthier? Randomized experiments provide answers. Are expensive private colleges and selective public high schools better than more pedestrian institutions? Regression analysis and a regression discontinuity design reveal the surprising truth. When private banks teeter, and depositors take their money and run, should central banks step in to save them? Differences-in-differences analysis of a Depression-era banking crisis offers a response. Could arresting O. J. Simpson have saved his ex-wife's life? Instrumental variables methods instruct law enforcement authorities in how best to respond to domestic abuse. Wielding econometric tools with skill and confidence, *Mastering 'Metrics* uses data and statistics to illuminate the path from cause to effect. Shows why econometrics is

important Explains econometric research through humorous and accessible discussion Outlines empirical methods central to modern econometric practice Works through interesting and relevant real-world examples *Nick Drake's Pink Moon* Amanda Petrusich 2007-10-15 This book explores how a tiny acoustic record (Pink Moon) has pattered and purred its way into a new millennium. Amanda Petrusich interviews producer Joe Boyd, string arranger Robert Kirby, and eventhe marketingteam behind the VW commercial.
