**Trends in managerial and financial accounting** Cees van Dam 2012-12-06 In August, 1976 the research seminar 'Decision-making in business' was organized at Nijenrode, The Netherlands School of Business. More than fifty scientists and practitioners from nine countries presented research papers in one of the six discussion groups. Some of them also presented some of their ideas in front of a large mixed audience at a one-day symposium. Many of the papers presented at Nijenrode were of such a high quality that the decision to publish a selection of them was an easy one. At the same time the new series Nijenrode studies in business was initiated. All who were involved, the policy committee of the Nijenrode studies, the advisory and editorial board of the series, the publisher, and the organizing committee of the seminar and symposium, acclaimed the idea of publishing three volumes in the new series. A collection of eleven papers could be grouped under the title Trends in managerial and financial accounting. Another collection will be published as volume 2 of this series under the title Trends in financial decision-making, while volume 3 will consist of papers exploring the theme Trends in business ethics. The books are intended for those who are interested in new developments in the decision-making area. They are especially suitable for graduate or

advanced undergraduate courses: volume 1 in managerial or financial accounting courses; volume 2 in courses on managerial finance, capital budgeting or decision making; and volume 3 in courses on business ethics or related fields.
