witness it bears for younger women about the snobbery and sexism their mothers and grandmothers endured as the price of entry into mid-century American professional life." - The Boston Globe "A real-life Peggy Olson, right out of Mad Men." -Shelly Lazarus, Chairman, Ogilvy & Mather

What was it like to be an advertising woman on Madison Avenue in the 60s and 70s - that Mad Men era of casual sex and professional serfdom? A real-life Peggy Olson reveals it all in this immensely entertaining and bittersweet memoir. Mad Women is a tell-all account of life in the New York advertising world by Jane Maas, a copywriter who succeeded in the primarily male jungle depicted in the hit show Mad Men. Fans of the show are dying to know how accurate it is: was there really that much sex at the office? Were there really three-martini lunches? Were women really second-class citizens? Jane Maas says the answer to all three questions is unequivocally "yes." Her book,

based on her own experiences and countless interviews with her peers, gives the full stories, from the junior account man whose wife almost left him when she found the copy of Screw magazine he'd used to find "a date" for a client, to the Ogilvy & Mather's annual Boat Ride, a sex-and-booze filled orgy, from which it was said no virgin ever returned intact. Wickedly funny and full of juicy inside information, Mad Women also tackles some of the tougher issues of the era, such as unequal pay, rampant, jaw-dropping sexism, and the difficult choice many women faced between motherhood and their careers.

discipline, regulation and supervision, and reopened important policy debates on financial regulation. Since the onset of the crisis, emphasis has been placed on better regulation of banking systems and on enhancing the tools available to supervisory agencies to oversee banks and intervene speedily in case of distress. Drawing on ten years of data and analysis, Global Financial Development Report 2019/2020 provides evidence on the regulatory remedies adopted to prevent future financial troubles, and sheds light on important policy concerns. To what extent are regulatory reforms designed with high-income countries in mind appropriate for developing countries? What has been the impact of reforms on market discipline and bank capital? How should countries balance the political and social demands for a safety net for users of the financial system with potentially severe moral hazard consequences? Are higher capital requirements damaging to the flow of credit?

How should capital regulation be designed to improve stability and access? The report provides a synthesis of what we know, as well as areas where more evidence is still needed. Global Financial Development Report 2019/2020 is the fifth in a World Bank series. The accompanying website tracks financial systems in more than 200 economies before, during, and after the global financial crisis

Chapters contain traditional "Gone to Texas" accounts and articles about people or methods of travel from days gone by. Others are dedicated to trains and cars and the lore associated with two-wheeled machines, machines that fly, and machines that scream across the land at dangerous speeds. The volume concludes with articles that consider how we fuel our machines and ourselves, and the rituals we engage in when we're on our way from here to there.

Bordered Heegaard Floer Homology

Robert Lipshitz
2018-08-09 The authors construct Heegaard Floer theory for 3-manifolds with connected boundary. The theory associates to an oriented, parametrized two-manifold a differential graded algebra. For a three-manifold with parametrized boundary, the invariant comes in two different versions, one of which (type D) is a module over the algebra and the other of which (type A) is an A^∞ module. Both are well-defined up to chain homotopy equivalence. For a decomposition of a 3-manifold into two pieces, the A^∞ tensor product of the type D module of one piece and the type A module from the other piece is \hat{HF} of the glued manifold. As a special case of the construction, the authors specialize to the case of three-manifolds with torus boundary. This case can be used to give another proof of the surgery exact triangle for \hat{HF} . The authors relate the bordered Floer homology of a three-manifold with torus boundary

with the knot Floer homology of a filling.

expression of our fucked-up culture that I know.” -- John Hellpern, New York Observer
“A gut-grabbing revival. Live Schreiber is playing Barry Champlain, an abrasive radio talk show host who, as another character puts it, has seen the face of God ‘in the mirror.’ In the course of one eventful night, Barry will be forced to confront another, less august image of himself... the most lacerating portrait of a human meltdown this side of a Francis Bacon painting. Like the original production, which starred Mr. Bogosian as Barry, it allows the star to grab an audience by the lapels and shake it into submission.” -- Ben Brantley, New York Times
“More timely today than it was twenty years ago... Radio crackles with intensity.” -- Joe Dziemianowicz, New York Daily News
“Hypnotic! Both as an actor’s tour-de-force and a stinging cultural analysis.” -- David Rooney, Variety
This is the fully revised version of Eric Bogosian’s Talk Radio, his breakthrough 1987 Public Theater hit, which was named

a finalist for the Pulitzer Prize for Drama, was adapted to film by Oliver Stone, and was revived on Broadway in 2007 in celebration of the play’s twentieth anniversary. One of America’s premier performers and most innovative and provocative artists, Eric Bogosian’s plays and solo work include suburbia (Lincoln Center Theater, 1994; adapted to film by director Richard Linklater, 1996); Sex, Drugs, Rock & Roll, Pounding Nails in the Floor with My Forehead; Griller; Humpty Dumpty; 1+1; Skunkweed; Wake Up and Smell the Coffee; Drinking in America; Notes from Underground and Talk Radio (Pulitzer Prize finalist; New York Shakespeare Festival, 1987; Broadway, 2007; adapted to film by director Oliver Stone, 1988). He has starred in a wide variety of film, TV and stage roles. Most recently, he created the character of Captain Danny Ross on the long-running series Law & Order: Criminal Intent. In 2014, TCG published 100 (monologues), a collection that

commemorates thirty years of Bogosian's solo-performance career.

Revealed Biodiversity Eric L Jones 2013-11-29
Revealed Biodiversity: An Economic History of the Human Impact aims to show that for several centuries environmental conditions have been substantially the product of economic fluctuations. It contests the notion of perpetual decline in species composition. The arguments are supported by far more precise historical detail than is usual in books about ecology. The need to take the gains to human society into account when assessing environmental change is strongly emphasized. The book features case studies including England, the Netherlands, USA, East Asia, Brazil, and the areas of modern agricultural 'land grab'. This book is important for its close attention to the documented historical record of environmental change in several countries over several centuries; for its demonstration

of how much wildlife populations have been influenced by fluctuations in market activity; for revealing the need to be sensitive to historical baselines; and for emphasizing the imperative of taking the gains to human society into account when assessing environmental change. It, therefore, has considerable significance for environmental and conservation policies as well as for future studies in ecological history. many problems raised by the history of biodiversity and moves between the illuminating local case study and the large-scale perspective with consummate ease." Robert A Dodgshon Emeritus Professor of Human Geography Institute of Geography and Earth Sciences Aberystwyth University, UK "Revealed Biodiversity refers both to the possibilities of enjoying nature in the modern world and the importance of understanding it through a well-argued and accessibly written economic history. Environmentalists will not find this book a comfortable read, but it is an essential one if they are to engage meaningfully with the issue of biodiversity." Patrick Dillon Professor of Applied Education Sciences University of Eastern Finland, Finland "It is best to view Revealed Biodiversity as a starting point for future studies of biodiversity that takes seriously the mutual interaction between the economy and the surrounding environment. In this respect,

the book is in the best tradition of environmental histories which examine the complex interplay between the economy, society, and the environment." 2017-11-07 Successful international integration has underpinned most experiences of rapid growth, shared prosperity, and reduced poverty. Perhaps no sector of the economy better illustrates the potential benefits--but also the perils--of deeper integration than banking. International banking may contribute to faster growth in two important ways: first, by making available much needed capital, expertise, and new technologies; and second, by enabling risk-sharing and diversification. But international banking is not without risks. The global financial crisis vividly demonstrated how international banks can transmit shocks across the globe. The Global Financial Development Report 2017/2018 brings to bear new evidence on the debate on the benefits and costs of international banks, particularly for developing countries. It provides evidence-based policy guidance on a range of issues that developing

countries face. Countries that are open to international banking can benefit from global flows of funds, knowledge, and opportunity, but the regulatory challenges are complex and, at times, daunting. Global Financial Development Report 2017/2018 is the fourth in a World Bank series. The report also tracks financial systems in more than 200 economies before and during the global financial crisis on an accompanying website (www.worldbank.org/financialdevelopment). **Note: This World Bank report, Global Financial Development Report 2017/2018: Bankers without Borders, is not associated with the Grameen Foundation's Bankers without Borders program, which engages volunteer consultants to donate their expertise to serve social enterprises and nonprofits in poor countries.
