**Understanding the Working College Student** Laura W. Perna 2023-07-14 How appropriate for today and for the future are the policies and practices of higher education that largely assume a norm of traditional-age students with minimal on-campus, or no, work commitments? Despite the fact that work is a fundamental part of life for nearly half of all undergraduate students - with a substantial number of "traditional" dependent undergraduates in employment, and working independent undergraduates averaging 34.5 hours per week - little attention has been given to how working influences the integration and engagement experiences of students who work, especially those who work full-time, or how the benefits and costs of working differ between traditional age-students and adult students. The high, and increasing, prevalence and intensity of working among both dependent and independent students raises a number of important questions for public policymakers, college administrators, faculty, academic advisors, student services and financial aid staff, and institutional and educational researchers, including: Why do so many college students work so many hours? What are the characteristics of undergraduates who work? What are the implications of working for students' educational experiences and outcomes? And, how can public and institutional policymakers promote the educational success of undergraduate students who work? This book offers the most complete and comprehensive conceptualization of the "working college student" available. It provides a multi-faceted picture of the characteristics, experiences, and challenges of working college students and a more complete understanding of the heterogeneity

underlying the label "undergraduates who work" and the implications of working for undergraduate students' educational experiences and outcomes. The volume stresses the importance of recognizing the value and contribution of adult learners to higher education, and takes issue with the appropriateness of the term "non-traditional" itself, both because of the prevalence of this group, and because it allows higher education institutions to avoid considering changes that will meet the needs of this population, including changes in course offerings, course scheduling, financial aid, and pedagogy.

**Baby Steps Millionaires** Dave Ramsey 2022-01-11 You Can Baby Step Your Way to Becoming a Millionaire Most people know Dave Ramsey as the guy who did stupid with a lot of zeros on the end. He made his first million in his twenties--the wrong way--and then went bankrupt. That's when he set out to learn God's ways of managing money and developed the Ramsey Baby Steps. Following these steps, Dave became a millionaire again--this time the right way. After three decades of guiding millions of others through the plan, the evidence is undeniable: if you follow the Baby Steps, you will become a millionaire and get to live and give like no one else. In *Baby Steps Millionaires*, you will . . . \*Take a deeper look at Baby Step 4 to learn how Dave invests and builds wealth \*Learn how to bust through the barriers preventing them from becoming a millionaire \*Hear true stories from ordinary people who dug themselves out of debt and built wealth \*Discover how anyone can become a millionaire, especially you *Baby Steps Millionaires* isn't a book that tells the secrets of the rich. It doesn't teach complicated financial concepts reserved only for the elite. As a matter of fact, this information is straightforward, practical, and maybe even a little boring. But the life you'll lead if you follow the Baby Steps is anything but boring! You don't need a large inheritance or the winning lottery number to become a millionaire. Anyone can do it--even today. For those who are ready, it's game on!

**Student Financial Literacy** Dorothy B. Durband 2012-03-31 College students are particularly vulnerable to making poor financial decisions. One method of addressing personal finances and financial stress among students of higher education is through university based financial education programs. *Student Financial Literacy: Program Development* presents effective strategies to assist in the implementation or the enhancement of a program as a tool to improve students' educational experience and financial well-being. It presents the key components of financial education programs designed to address the growing concerns associated with high levels of debt and low levels of financial literacy among college students. "Student Financial Literacy: Campus-Based Program Development is packed with financial education and counseling information and guidance. It was very difficult to write this review as I wanted to share ALL the excellent direction this book provides... The editors and contributing authors have developed an excellent resource for not only those interested in developing or enhancing a campus-based financial education program but also for anyone involved in financial education, counseling, and planning." -Rebecca J. Travnichek, Family Financial Education Specialist, University of Missouri Extension Journal of Financial Counseling and Planning

Equity by Design Mirko Chardin 2020-07-20 "Our calling is to drop our egos, commit to removing barriers, and treat our learners with the unequivocal respect and dignity they deserve." --Mirko Chardin and Katie Novak When it comes to the hard work of reconstructing our schools into places where every student has the opportunity to succeed, Mirko Chardin and Katie Novak are absolutely convinced that teachers should serve as our primary architects. And by "teachers" they mean legions of teachers working in close collaboration. After all, it's teachers who design students' learning experiences, who build student relationships . . . who ultimately have the power to change the trajectory of our students' lives. *Equity by Design* is intended to serve as a blueprint for teachers to alter the all-too-predictable outcomes for our historically under-served students. A first of its kind resource, the book makes the critical link between social justice and Universal Design for Learning (UDL) so that we can equip students (and teachers, too) with the will, skill, and collective capacity to enact positive change. Inside you'll find: Concrete strategies for designing and delivering a culturally responsive, sustainable, and equitable framework for all students Rich examples, case studies, and implementation spotlights of educators, students

(including Parkland survivors), and programs that have embraced a social justice imperative Evidence-based application of best practices for UDL to create more inclusive and equitable classrooms A flexible format to facilitate use with individual teachers, teacher teams, and as the basis for whole-school implementation "Every student," Mirko and Katie insist, "deserves the opportunity to be successful regardless of their zip code, the color of their skin, the language they speak, their sexual and/or gender identity, and whether or not they have a disability." Consider *Equity by Design* a critical first step forward in providing that all-important opportunity. *Your Money, Your Goals* Consumer Financial Consumer Financial Protection Bureau 2015-03-18 Welcome to the Consumer Financial Protection Bureau's *Your Money, Your Goals*: A financial empowerment toolkit for social services programs! If you're reading this, you are probably a case manager, or you work with case managers. Finances affect nearly every aspect of life in the United States. But many people feel overwhelmed by their financial situations, and they don't know where to go for help. As a case manager, you're in a unique position to provide that help. Clients already know you and trust you, and in many cases, they're already sharing financial and other personal information with you. The financial stresses your clients face may interfere with their progress toward other goals, and providing financial empowerment information and tools is a natural extension of what you are already doing. What is "financial empowerment" and how is it different from financial education or financial literacy? Financial education is a strategy that provides people with financial knowledge, skills, and resources so they can get, manage, and use their money to achieve their goals. Financial education is about building an individual's knowledge, skills, and capacity to use resources and tools, including financial products and services. Financial education leads to financial literacy. Financial empowerment includes financial education and financial literacy, but it is focused both on building the ability of individuals to manage money and use financial services and on providing access to products that work for them. Financially empowered individuals are informed and skilled; they know where to get help with their financial challenges. This sense of empowerment can build confidence that they can effectively use their financial knowledge, skills, and resources to reach their goals. We designed this toolkit to help you help your clients become financially empowered consumers. This financial empowerment toolkit is different from a financial education curriculum. With a curriculum, you are generally expected to work through most or all of the material in the order presented to achieve a specific set of objectives. This toolkit is a collection of important financial empowerment information and tools you can access as needed based on the client's goals. In other words, the aim is not to cover all of the information and tools in the toolkit - it is to identify and use the information and tools that are best suited to help your clients reach their goals.

**The Constitution of Algorithms** Florian Jatton 2021-04-27 A laboratory study that investigates how algorithms come into existence. Algorithms--often associated with the terms big data, machine learning, or artificial intelligence--underlie the technologies we use every day, and disputes over the consequences, actual or potential, of new algorithms arise regularly. In this book, Florian Jatton offers a new way to study

computerized methods, providing an account of where algorithms come from and how they are constituted, investigating the practical activities by which algorithms are progressively assembled rather than what they may suggest or require once they are assembled.

**Drug Dealer, MD** Anna Lembke 2016-11-15 The disturbing connection between well-meaning physicians and the prescription drug epidemic.

Three out of four people addicted to heroin probably started on a prescription opioid, according to the director of the Centers for Disease Control and Prevention. In the United States alone, 16,000 people die each year as a result of prescription opioid overdose. But perhaps the most frightening aspect of the prescription drug epidemic is that it's built on well-meaning doctors treating patients with real problems. In *Drug Dealer, MD*, Dr. Anna Lembke uncovers the unseen forces driving opioid addiction nationwide. Combining case studies from her own practice with vital statistics drawn from public policy, cultural anthropology, and neuroscience, she explores the complex relationship between doctors and patients, the science of addiction, and the barriers to successfully addressing drug dependence and addiction. Even when addiction is recognized by doctors and their patients, she argues, many doctors don't know how to treat it, connections to treatment are lacking, and insurance companies won't pay for rehab. Full of extensive interviews—with health care providers, pharmacists, social workers, hospital administrators, insurance company executives, journalists, economists, advocates, and patients and their families—*Drug Dealer, MD*, is for anyone whose life has been touched in some way by addiction to prescription drugs. Dr. Lembke gives voice to the millions of Americans struggling with prescription drugs while singling out the real culprits behind the rise in opioid addiction: cultural narratives that promote pills as quick fixes, pharmaceutical corporations in cahoots with organized medicine, and a new medical bureaucracy focused on the bottom line that favors pills, procedures, and patient satisfaction over wellness. Dr. Lembke concludes that the prescription drug epidemic is a symptom of a faltering health care system, the solution for which lies in rethinking how health care is delivered.

**Building Academic Vocabulary** Robert J. Marzano 2006-12-01 In *Building Academic Vocabulary: Teacher's Manual*, Robert J. Marzano and Debra J. Pickering give teachers a practical way to help students master academic vocabulary. Research has shown that when teachers, schools, and districts take a systematic approach to helping students identify and master essential vocabulary and concepts of a given subject area, student comprehension and achievement rises. In the manual, readers will find the following tools: \* A method to help teachers, schools, and districts determine which academic vocabulary terms are most essential for their needs \* A six-step process for direct instruction in subject area vocabulary \* A how-to to help students use the *Building Academic Vocabulary: Student Notebook*. The six-step method encourages students to learn critical academic vocabulary by connecting these terms to prior knowledge using linguistic and non-linguistic means that further encourage the refinement and deepening of their understanding. \* Suggestions for tailoring academic vocabulary procedures for English Language Learners. \* Samples and blackline masters for a variety of review activities and games that reinforce and refine student understanding of the academic terms and concepts they learn. The book also includes a list of 7, 923 vocabulary terms culled from the national standards documents and other publications, organized into 11 subject areas and 4 grade-level categories. *Building Academic Vocabulary: Teacher's Manual* puts into practice the research and ideas outlined in Marzano's previous book *Building Background Knowledge for Academic Achievement*. Using the teacher's manual and vocabulary notebooks, educators can guide students in using tools and activities that will help them deepen their own understanding of critical academic vocabulary--the building blocks for achievement in each discipline.
