A Philosophical Inquiry into Subject English and Creative Writing Oli Belas 2022-11-18 While engaging with the current political-educational climate of England, this book offers a timely contribution to debates around

questions of knowledge in relation to education and school-level English by drawing together theories of individual and disciplinary knowledge. The book provides a philosophical conception of knowledge – as fundamentally embodied at the level of the individual, and a matter of cultural form at the level of shared or "common" knowledge – and an analysis of the implications of this for schooled English. The research draws from various related fields including literary criticism, philosophy (of knowledge and of symbolic form), and phenomenology. The book rethinks general notions of knowledge and lays out the problems that exist within knowledge and language systems in education, especially secondary and university levels. This highly relevant and informative book offers an insightful resource for academics, researchers, and post-graduate students in the fields of education studies, educational policy and politics, philosophy of education, and

literature studies.

Shakespeare's Props Sophie Duncan 2019-01-30
Cognitive approaches to drama have enriched our understanding of Early Modern playtexts, acting and spectatorship. This monograph is the first full-length study of Shakespeare's props and their cognitive impact. Shakespeare's most iconic props have become transhistorical, transnational metonyms for their plays: a strawberry-spotted handkerchief instantly recalls

Othello; a skull Hamlet. One reason for stage properties' neglect by cognitive theorists may be the longstanding tendency to conceptualise props as detachable body parts: instead, this monograph argues for props as detachable parts of the mind. Through props, Shakespeare's characters offload, reveal and intervene in each other's cognition, illuminating and extending their affect. Shakespeare's props are neither static icons nor substitutes for the body, but volatile, malleable, and dangerously exposed extensions of his characters' minds. Recognising them as such offers new readings of the plays, from the way memory becomes a weapon in Hamlet's Elsinore, to the pleasures and perils of Early Modern gift culture in Othello. The monograph illuminates Shakespeare's exploration of extended cognition, recollection and remembrance at a time when the growth of printing was forcing Renaissance culture to rethink

the relationship between memory and the object. Readings in Shakespearean stage history reveal how props both carry audience affect and reveal cultural priorities: some accrue cultural memories, while others decay and are forgotten as detritus of the stage.

IGCSE Mathematics Ric

Pimentel 2006-02 New edition of our best-selling IGCSE Mathematics textbook

Human Rights in Northern Ireland Brice Dickson

2015-02-26 This Handbook is the latest version of a book that was last published in 2003, and has been completely revised to take account of the innumerable legal developments since then. The book contains 26 chapters on topics ranging across the full spectrum of civil, political, social, economic and environmental rights, with particular emphasis on the right not to be discriminated against. It is currently the most comprehensive and practical publication on the state of human rights in Northern Ireland. This is a part of the world where, as well as ongoing issues arising out of the conflict ('emergency laws' are still in place, for example), there are familiar questions concerning the rights of people with poor mental health, the law relating to family and

sexual matters, children's rights, education rights, employment rights, housing rights, and social security rights. The contributors to the book are all experts in their field, most of them with years of experience as human rights activists and advisers. The book provides precise information about relevant legislation and case law (on which there are tables) and is fully indexed.

How World Events Are Changing Education

2022-02-07 "Education was established to create employees for 19th and 20th century manufacturing models. The 21st century requires a rethink. Change is happening fast, with jobs not guaranteed as robots are taking over routines. We must prepare students for uncertainty & higher-level employment - helping them think and communicate instead of retain and recall facts for passing exams. Some curricula is either irrelevant for today or gained at the press of a button.
