Bulk Material Handling Michael Rivkin Ph.D. 2018-09-15 Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as:

- physical principles of various material handling systems;
- considerations in selecting technically efficient and environmentally friendly equipment;
- best practices in upgrading and optimizing existing bulk material handling facilities;
- strategies to select proper equipment in the early phases of a new project.

Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

Software Engineering Mathematics Janet Woodcock 2014 This book makes the mathematical basis of formal methods accessible both to the student and to the professional. It is motivated in the later chapters by examples and exercises. Throughout, the premise is that mathematics is as essential to design and construction in software engineering as it is to other engineering disciplines. The exercises range from simple drills, intended to provide familiarity with concepts and notation, to advanced material. The first four chapters of the book are devoted to foundations, with an introduction to formal systems, then the propositional and predicate calculi, concluding with a chapter on theories in general. The second part of the book builds upon the foundations by covering in detail the theory of sets, relations, functions, and sequences. The mathematical data types then presented are powerful enough to describe many aspects of software systems, and small case studies are included as examples of their use in the modelling of software: a configuration manager, a storage allocator, and a simple backing store interface. The concrete syntax of the Z notation has been adopted. The third part of the book presents two detailed case studies in the use of mathematics in software engineering. The first is the specification of the behaviour of a telephone exchange, and the second illustrates the importance of the development of a mathematical theory in gaining an understanding of a system. Both case studies stress the roles of modelling and of proof in the construction of specifications. The final part describes the algebraic approach to specification and then summarizes and compares the various formal techniques.

The Curatorial Complex Wiebke Gronemeyer 2018 By analyzing how artistic and curatorial practices can activate processes and generate structures that facilitate dialogical spaces of communication between curators, artists and their publics, The Curatorial Complex addresses the social dimensions of knowledge production for the ways people and art come together in the curated encounter. Questions around what knowledge is and how it can be produced are paired with critically addressing in the proliferation of knowledge production as part of the intellectualization of the art field and its commodification in the knowledge economy. The Curatorial Complex beschreibt, wie Wissen über Kunst in und durch Gesellschaft entsteht. Künstler, Ausstellungsmacher und Vermittler schaffen dialogische Kommunikationsräume, in denen soziale, politische, und kulturelle Dimensionen unseres Lebens exemplarisch verhandelt werden. Das Verhältnis von Kunst und Gesellschaft betreffend hat kuratorische Praxis die Funktion, sowohl Reflexionsräume zu schaffen, als auch Wissen zu generieren. Durch die Analyse, wie künstlerische und kuratorische Praktiken Prozesse aktivieren und Strukturen erzeugen können, die dialogische Kommunikationsräume zwischen Kuratoren, Künstlern und ihrem Publikum eröffnen, wird hinterfragt, was für ein Wissen denn überhaupt generiert wird, wenn Menschen Kunst begegnen. Aus Perspektive der kuratorischen Handlung wird die gesellschaftsbildende Dimension dieser Begegnung vor dem Hintergrund der Intellektualisierung des Kunstfeldes und seiner Kommodifizierung in der Wissensökonomie untersucht. **Mordin on Time** Nick Mordin 2003-02 In Mordin On Time, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse?
