*Brand New Justice* Simon Anholt 2006-08-11 Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the economically underprivileged. Brand New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms.

*Design Struggles* Claudia Mareis 2021-04-27 This publication offers a critical assessment of the complicity of design in creating, perpetuating, and reinforcing social, political, and environmental problems, both today and in the past. It proposes going against the grain by problematising Western notions of design to foster situated, decolonial, and queer-feminist modes of disciplinary self-critique, and looks at design through the intersections of gender, culture, ethnicity, and class. Applying robust scholarly insight with engaging and accessible modes of conveyance and storytelling, an urgent and expansive array of voices and views emerge from those engaged in struggles with, against, or around the field of design.

**Afrofuturism 2.0** Reynaldo Anderson 2015-12-16 The ideas and practices related to afrofuturism have existed for most of the 20th century, especially in the north American African diaspora community. Bowen 2014 "This book addresses many of the common reasons why the so-called "Rust Belt" cities suffered decline and the many solutions proposed and efforts already undertaken that seek to reverse the decline and spur rejuvenation. The contributors discuss the reasons for the decline including globalization, energy policy-related issues, and even the impact of air conditioning on location decisions. They also detail many of the entrepreneurial efforts undertaken in cities like Cleveland that are helping to reinvigorate once-depressed areas, offer suggestions related to investments in workforce training and current energy policy, critique the use of economic development subsidies, discuss the success of clusters at reviving old industrial cities, and provide cultural insights on business practices in China. Overall, this book does not offer a one-size-fits-all solution to the economic woes still facing many of the depressed Rust Belt cities; rather, it offers a multitude of ideas that could be used to stimulate entrepreneurship and generate prosperity."--Publisher's website.

**The Biopolitics of Beauty** Alvaro Jarrín 2017-08-29 The Biopolitics of Beauty examines how beauty became an aim of national health in Brazil. Using ethnographic fieldwork carried out in Brazilian hospitals, the author shows how plastic surgeons and patients navigate the public health system to transform beauty into a basic health right. The book historically traces the national concern with beauty to Brazilian eugenics, which established beauty as an index of the nation's racial improvement. From here, Jarrín explains how plastic surgeons became the main proponents of a raciology of beauty, using it to gain the backing of the Brazilian state. Beauty can be understood as an immaterial form of value that Jarrín calls "affective capital," which maps onto and intensifies the social hierarchies of Brazilian society. Patients experience beauty as central to national belonging and to gendered aspirations of upward mobility, and they become entangled in biopolitical rationalities that complicate their ability to consent to the risks of surgery. The Biopolitics of Beauty explores not only the biopolitical regime that made beauty a desirable national project, but also the subtle ways in which beauty is laden with affective value within everyday social practices—thus becoming the terrain upon which race, class, and gender hierarchies are reproduced and contested in Brazil.

*The Shock Doctrine* Naomi Klein 2010-04-01 The bestselling author of No Logo shows how the global "free market" has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting, Naomi Klein introduced the term "disaster capitalism." Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic "shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.
