3 books to know Voyages

extraordinaires Jules Verne
2020-05-02 Welcome to the 3 Books To Know series, our idea is to help readers learn about fascinating topics through three essential and relevant books. These carefully selected works can be fiction, non-fiction, historical documents or even biographies. We will always select for you three great works to instigate your mind, this time the topic is: Voyages Extraordinaires: Twenty Thousand Leagues

under the Sea Around the World in 80 Days From the Earth to the Moon All by Jules Verne The Voyages Extraordinaires is a sequence of fifty-four novels by Jules Verne. The goal of the Voyages was to outline the geographical, geological, physical, and astronomical knowledge amassed by science and to recount, in an entertaining format. Verne's attention to detail coupled with his sense of wonder form the backbone of the Voyages. In Twenty Thousand Leagues under the Sea we travel in the submarine Nautilus. The crew cut off any relationship with the nations and with humanity. They live only on what the sea gives them - food, the raw material they need for the production of electricity. Around the World in Eighty Days tells the journey of an aristocrat and his employee who, motivated by a bet, try to go around the world with limited time and resources. It was the most popular of Verne's Voyages extraordinaires series of

novels. From the Earth to the Moon tells the story of attempts to catapult a manned projectile onto the Moon. It is curious that some of Verne's calculations, in spite of the lack of empirical data, are quite accurate. This is one of many books in the series 3 Books To Know. If you liked this book, look for the other titles in the series, we are sure you will like some of the topics.

Frankenstein Dreams

Michael Sims 2017-09-05 From Mary Shelley to H.G. Wells, a collection of the best Victorian science fiction from Michael Sims, the editor of Dracula's Guest. Long before 1984, Star Wars, or The Hunger Games, Victorian authors imagined a future where new science and technologies reshaped the

world and universe they knew. The great themes of modern science fiction showed up surprisingly early: space and time travel, dystopian societies, even dangerously independent machines, all inspiring the speculative fiction of the Victorian era. In *Frankenstein Dreams*, Michael Sims has gathered many of the very finest stories, some by classic writers such as Jules Verne, Mary Shelley, and H.G. Wells, but many that will surprise general readers. Dark visions of the human psyche emerge in Thomas Wentworth Higginson's "The Monarch of Dreams," while Mary E. Wilkins Freeman provides a glimpse of "the fifth dimension" in her provocative tale "The Hall Bedroom." With contributions by Edgar Allan Poe, Alice Fuller, Rudyard Kipling, Thomas Hardy, Arthur Conan Doyle, and many others, each introduced by Michael Sims, whose elegant introduction provides valuable literary and historical context, *Frankenstein Dreams* is a treasure trove of stories known

and rediscovered.

The Best of Jules Verne Jules Verne 2016-06-14 Four iconic novels of adventure, science, and fantasy from a master storyteller far ahead of his

time. In *Twenty Thousand Leagues Under the Sea*, a monster wreaks havoc in the waters of the Atlantic Ocean. The US government sends a French marine biologist, his servant, and a Canadian harpoonist to take care of the problem. But instead of a mythic beast, the team finds the submarine *Nautilus* and its fearsome helmsman, Captain Nemo. *Around the World in Eighty Days* follows Phileas Fogg and his eccentric manservant, Passepartout, on an epic quest to circumnavigate the globe. Pursued by a Scotland Yard detective, derailed by a herd of bison, and attacked by Sioux Indians, the travelers use every mode of transportation possible to race from one exotic exploit to the next. From the sands of Egypt to the icy waters of the Pacific, Fogg and Passepartout never lose sight of their goal—even when they stop to rescue a beautiful damsel in distress. *Journey to the Center of the Earth* is a cornerstone of science fiction and one of the greatest stories ever told. A

dirty slip of parchment paper falls from the pages of an ancient manuscript. Deciphered by the indefatigable Otto Liedebrook, professor of geology, and his reluctant nephew, Axel, the parchment's coded message asserts that a volcano in Iceland contains a passageway to the center of the earth. Two days later, the adventurers embark on a journey so fantastic it will alter the very meaning of history. In *The Mysterious Island*, a hot air balloon hijacked by captured Union army soldiers is blown far, far away from its point of departure in Richmond, Virginia. When the craft crash-lands on an island in the South Pacific, the prisoners must contend with wild animals, pirates, and an active volcano—in a fight for their very survival. This ebook has been professionally proofread to ensure accuracy and readability on all devices. [Twenty Thousand Leagues Under The Sea \(With Original Illustrations\)](#) Jules Verne
2017-10-16 "Twenty Thousand

Leagues Under The Sea" is a classic science fiction novel by Jules Verne published in 1870. It tells the story of Captain Nemo and his submarine Nautilus, as seen from the perspective of Professor Pierre Aronnax. The title refers to the distance travelled while under the sea and not to a depth, as 20,000 leagues is over six times the diameter, and nearly three times the circumference of the Earth. The greatest depth mentioned in the book is four leagues. The book uses metric leagues, which are four kilometres each. A literal translation of the French title would end in the plural "seas", thus implying the "seven seas" through which the characters of the novel travel. The book was highly acclaimed when released and still is now; it is regarded as one of the premiere adventure novels and one of Verne's greatest works. Jules Verne (1828-1905) was a French novelist, poet, and playwright best known for his adventure novels and his profound influence on the literary genre of science

fiction.

Welcome to the Masters of Prose book series, a selection of the best works by noteworthy authors. Literary critic August Nemo selects the most important writings of each author. A selection based on the author's novels, short stories, letters, essays and biographical texts. Thus providing the reader with an overview of the author's life and work. This edition is dedicated to the French writer Jules Verne. Verne is generally considered a major literary author in France and most of Europe, where he has had a wide influence on the literary avant-garde and on surrealism. His reputation was markedly different in Anglophone regions where he had often been

labeled a writer of genre fiction or children's books, largely because of the highly abridged and altered translations in which his novels have often been printed. Since the 1980s, his literary reputation has improved. Verne has been the second most-translated author in the world since 1979, ranking between Agatha Christie and William Shakespeare. He has sometimes been called the "Father of Science Fiction", a title that has also been given to H. G. Wells and Hugo Gernsback. This book contains the following writings: Novels: Twenty Thousand Leagues under the Sea; Around the World in 80 Days; From the Earth to the Moon; Journey to the Centre of the Earth; Five Weeks in a Balloon. Short Stories: A Drama in Mexico; A Drama in the Air; A Winter Amid the Ice; The Blockade Runners; The Mutineers of the "Bounty"; Frritt-Flacc; Off on a Cometeor Hector Servadac.
