Decolonizing Methodologies Linda Tuhiwai Smith 2016-03-15 'A landmark in the process of decolonizing imperial Western knowledge.' Walter Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.

Global Street Design Guide Global Designing Cities Initiative 2016-10-13 The Global Street Design Guide is a timely resource that sets a global baseline for designing streets and public spaces and redefines the role of streets in a rapidly urbanizing world. The guide will broaden how to measure the success of urban streets to include: access, safety, mobility for all users, environmental quality, economic benefit, public health, and overall quality of life. The first-ever worldwide standards for designing city streets and prioritizing safety, pedestrians, transit, and sustainable mobility are presented in the guide. Participating experts from global cities have helped to develop the principles that organize the guide. The Global Street Design Guide builds off the successful tools and tactics defined in NACTO's Urban Street Design Guide and Urban Bikeway Design Guide while addressing a variety of street typologies and design elements found in various contexts around the world.

The Theory of Capitalism in the German Economic Tradition Peter Koslowski 2013-11-11 The theory of capitalism and of the economic order is the central topic of the German economic tradition in the 20th century. Capitalism has not only been the topic for Marxist economics and for the Frankfurt School but also for the Historical School and for the postmarxist theory of capitalism in Ordo- and Neo-Liberalism as well as in Solidarism. The question of the foundations of the economic order of the market economy and of capitalism as well as the problem whether a third path between capitalism and social ism is possible occupied this tradition from the Historical School to Ordo Liberalism and the theory of the social market economy. The theory of capitalism and of the social market economy as well as the critique and reform developed in this theoretical tradition is important for the theory of economic systems as well as for today's problems of the economic order. Its relevance for the present world economy is visible in the discussions whether there exist different models of capitalism and whether they can be described as the Anglo-American and as the Rhenish model of capitalism influenced by the thought of the German economic tradition. Michel Albert, the author of this classification, gave the key-word in his book Capitalism against Capitalism. The papers of this book can help to clarify this debate by giving a first hand introduction to some of the main economic thinkers of capitalism.

The Aranda's Pepa Anna Kenny 2013-12-19 The German missionary Carl Strehlow (1871-1922) had a deep ethnographic interest in Aboriginal Australian cosmology and social life which he documented in his 7 volume work Die Aranda- und Loritja-Stämme in Zentral-Australien that remains unpublished in English. In 1913, Marcel Mauss called his collection of sacred songs and myths, an Australian Rig Veda. This immensely rich corpus, based on a lifetime on the central Australian frontier, is barely known in the English-speaking world and is the last great body of early Australian ethnography that has not yet been built into the world of Australian anthropology and its intellectual history. The German psychological and hermeneutic traditions of anthropology that developed outside of a British-Australian intellectual world were alternatives to 19th century British scientism. The intellectual roots of early German anthropology reached back to Johann Gottfried Herder (1744-1803), the founder of German historical particularism, who rejected the concept of race as well as the French dogma of the uniform development of civilisation. Instead he recognised unique sets of values transmitted through history and maintained that cultures had to be viewed in terms of their own development and purpose. Thus, humanity was made up of a great diversity of ways of life, language being one of its main manifestations. It is this tradition that led to a concept of cultures in the plural.

Originally published in 1995, this extensively revised edition provides fresh insights into the cactus plant's genetic resources, physiological traits, soil preferences and vulnerability to pests. It provides invaluable guidance on managing the resource to support food security and offers tips on how to exploit the plant's culinary qualities.

The Gift of the Magi O. Henry 2009-06-01 The Gift of the Magi is a treasured short story written by O. Henry. A young and very much in love couple can barely afford their one-room apartment, let alone the extra expense of getting Christmas presents for one another. But each is determined to show their love for the other in this traditional time of giving; each sells a thing they hold most dear in order to afford a present, with poignant and touching results that capture their love for one another.

Manual of Engineering Drawing Colin H. Simmons 2003-10-21 The Manual of Engineering Drawing has long been recognised as the student and practising engineer's guide to producing engineering drawings that comply with ISO and British Standards. The information in this book is equally applicable to any CAD application or manual drawing. The second edition is fully in line with the requirements of the new British Standard BS8888: 2002, and will help engineers, lecturers and students with the transition to the new standards. BS8888 is fully based on the relevant ISO standards, so this book is also ideal for an international readership. The comprehensive scope of this book encompasses topics including orthographic, isometric and oblique projections, electric and hydraulic diagrams, welding and adhesive symbols, and guidance on tolerancing. Written by a member of the ISO committee and a former college lecturer, the Manual of Engineering Drawing combines up-to-the-minute technical accuracy with clear, readable explanations and numerous diagrams. This approach makes this an ideal student text for vocational courses in engineering drawing and undergraduates studying engineering design / product design. Colin Simmons is a member of the BSI and ISO Draughting Committees and an Engineering Standards Consultant. He was formerly Standards Engineer at Lucas CAV. * Fully in line with the latest ISO Standards * A textbook and reference guide for students and engineers involved in design engineering and product design * Written by a former lecturer and a current member of the relevant standards committees

Essentials of Interventional Cancer Pain Management Amitabh Gulati 2018-12-28 This text provides a comprehensive review and expertise on various interventional cancer pain procedures. The first part of the text addresses the lack of consistency seen in the literature regarding interventional treatment options for specific cancer pain syndromes. Initially, it discusses primary cancer and treatment-related cancer pain syndromes that physicians may encounter when managing cancer patients. The implementation of paradigms that can be used in treating specific groups of cancer such as breast cancer, follows. The remainder of the text delves into a more common approach to addressing interventional cancer pain medicine. After discussing interventional options that are commonly employed by physicians, the text investigates how surgeons may address some of the more severe pain syndromes, and covers the most important interventional available for our patients, intrathecal drug delivery. Chapters also cover radiologic options in targeted neurolysis and ablative techniques, specifically for bone metastasis, rehabilitation to address patients' quality of life and function, and integrative and psychological therapies. Essentials of Interventional Cancer Pain Management globally assesses and addresses patients' needs throughout the cancer journey. Written by experts in the field, and packed with copious tables, figures, and flow charts, this book is a must-have for pain physicians, residents, and fellows.

Carlos Villa Mark Dean Johnson 2022-01-25 "Carlos Villa has been described as the preeminent Filipino American artist--a legend in artistic circles for his groundbreaking approaches and his influence on countless artists--but he remains little known to many fans and scholars of modern and contemporary art. Carlos Villa: Worlds in Collision is the first museum retrospective of his work, presented at the San Francisco Art Institute and the Asian Art Museum of San Francisco. Villa was trained at the San Francisco Art Institute in the 1950s as an abstract expressionist, and over time he transformed his practice to address issues of ethnic and cultural diversity. He concurrently assumed a leadership role in 'Third World' and 'multicultural' international art movements, and his large-scale works reference non-Western traditions, including tattoo, scarification, ritual, and ceremony. He was also an important theorist, curator, and organizer of public forums that he called 'actions.' This book traces the arc of his career from 1969 until his death in 2013, with emphasis on his feathered works from the 1970s, as well as later works that address aspects of the history of Filipinos in the United States. It illuminates the social and cultural roots--and global importance--of Villa's art and teaching career as he sought to forge a new kind of art-world inclusion that reflected his own experience, commitment to diversity, and boundary-bending imagination"--

The Choice Edith Eva Eger 2017-09-05 A New York Times Bestseller "I'll be forever changed by Dr. Eger's story...The Choice is a reminder of what courage looks like in the worst of times and that we all have the ability to pay attention to what we've lost, or to pay attention to what we still have."—Oprah "Dr. Eger's life reveals our capacity to transcend even the greatest of horrors and to use that suffering for the benefit of others. She has found true freedom and forgiveness and shows us how we can as well." —Desmond Tutu, Nobel Peace Prize Laureate "Dr. Edith Eva Eger is my kind of hero. She survived unspeakable horrors and brutality; but rather than let her painful past destroy her, she chose to transform it into a powerful gift—one she uses to help others heal." —Jeannette Walls, New York Times bestselling author of *The Glass Castle* Winner of the National Jewish Book Award and Christopher Award At the age of sixteen, Edith Eger was sent to Auschwitz. Hours after her parents were killed, Nazi officer Dr. Josef Mengele, forced Edie to dance for his amusement and her survival. Edie was pulled from a pile of corpses when the American troops liberated the camps in 1945. Edie spent decades struggling with flashbacks and survivor's guilt, determined to stay silent and hide from the past. Thirty-five years after the war ended, she returned to Auschwitz and was finally able to fully heal and forgive the one person she'd been unable to forgive—herself. Edie weaves her remarkable personal journey with the moving stories of those she has

helped heal. She explores how we can be imprisoned in our own minds and shows us how to find the key to freedom. The Choice is a life-changing book that will provide hope and comfort to generations of readers.

Arthrogyriposis Lynn T. Staheli 1998-04-28 The term arthrogyriposis describes a range of congenital contractures that lead to childhood deformities. It encompasses a number of syndromes and sporadic deformities that are rare individually but collectively are not uncommon. Yet, the existing medical literature on arthrogyriposis is sparse and often confusing. The aim of this book is to provide individuals affected with arthrogyriposis, their families, and health care professionals with a helpful guide to better understand the condition and its therapy. With this goal in mind, the editors have taken great care to ensure that the presentation of complex clinical information is at once scientifically accurate, patient oriented, and accessible to readers without a medical background. The book is authored primarily by members of the medical staff of the Arthrogyriposis Clinic at Children's Hospital and Medical Center in Seattle, Washington, one of the leading teams in the management of the condition, and will be an invaluable resource for both health care professionals and families of affected individuals.

The Gift Edith Eva Eger 2020-09-15 "I will be forever changed by Edith Eger's story." —Oprah A practical and inspirational guide to stopping destructive patterns and imprisoning thoughts to find freedom and joy in life—now updated to address the challenges of the pandemic and a world in crisis. World renowned psychologist and internationally bestselling author, Edith Eger's, powerful New York Times bestselling book *The Choice* told the story of her survival in the concentration camps, her escape, healing, and journey to freedom. Readers around the world wrote to tell her how *The Choice* moved them and inspired them to confront their own past and try to heal their pain. They asked her to write another, more prescriptive book. Eger's second book, *The Gift*, expands on her message of healing and provides a hands-on guide that gently encourages readers to change the thoughts and behaviors that may be keeping them imprisoned in the past. Eger explains that the worst prison she experienced is not the prison that Nazis put her in but the one she created for herself: the prison within her own mind. She describes the most pervasive imprisoning beliefs she has known—including fear, grief, anger, secrets, stress, guilt, shame, and avoidance—and the tools she has discovered to deal with these universal challenges. These lessons are offered through riveting and inspiring stories from her life and the lives of her patients. This new, revised edition of *The Gift* contains two new chapters that examine the invaluable insights and lessons Edie learned during the Covid-19 pandemic; a time she used to rediscover freedom even in lockdown and to enjoy the simple pleasures of life, including preparing and sharing meals with the ones we love. Edie includes recipes for some of her favorite dishes which have been updated and tested by her daughter Marianne Engle and explains how food can be a deep expression of love and connection. As readers seek to find joy and some peace in these challenging times, Eger's wisdom and heartfelt advice is as timely, and timeless, as ever and certain to resonate with Eger's devoted readers and those who have not yet found her transformational wisdom. Filled with empathy, insight, and humor, *The Gift* captures the vulnerability and common challenges we all face and provides encouragement and advice for breaking out of our personal prisons to find healing and greater joy in life.

BIM for Heritage Sofia Antonopoulou 2017 This guidance on Building Information Modelling for heritage (Historic BIM) offers guidance for owners, end-users and professionals in the fields of heritage and construction. By raising awareness of the potential advantages of a BIM approach, this guidance will help users successfully implement BIM in heritage projects. Historic BIM is, by definition, a multi-disciplinary process that requires the input and collaboration of professionals with very different skillsets. It is also a fast-developing field in terms of research, official guidance, standards and professional practice. This publication addresses the issues surrounding the production and use of BIM for history buildings, and provides information about guidance and standards available elsewhere for managing a building's entire life cycle effectively.
