Tory Burch Tory Burch 2014-10-14 Tory Burch sees the world in color, inspired by people, places, and ideas—all of which influence her brand, synonymous with print and color. In her first book, she explores what living in color means to her. The book is organized by color, each one brought to life through images of her own collections and travels; how she entertains; style icons; the works of artists, authors, and interior designers she admires; and the advice of business leaders—many of whom are interviewed within. The book also offers a glimpse into the more personal moments in Tory's life, such as family trips with her boys or the indelible ways in which her parents, Buddy and Reva Robinson, influenced her collection, company, and philosophy. The foreword is written by Anna Wintour, artistic director of Condé Nast and editor-in-chief of Vogue, and the cover features Damien Hirst's Beautiful Primal Urges Rug, © Damien Hirst and Science Ltd., all rights reserved / DACS, London / ARS, NY 2014. Global Street Design Guide Global Designing Cities Initiative 2016-10-13 The Global Street Design Guide is a timely resource that sets a global baseline for designing streets and public spaces and redefines the role of streets in a rapidly urbanizing world. The guide will broaden how to measure the success of urban streets to include: access, safety, mobility for all users, environmental quality, economic benefit, public health, and overall quality of life. The first-ever worldwide standards for designing city streets and prioritizing safety, pedestrians, transit, and sustainable mobility are presented in the guide. Participating experts from global cities have helped to develop the principles that organize the guide. The Global Street Design Guide builds off the successful tools and tactics defined in NACTO's Urban Street Design Guide and Urban Bikeway Design Guide while addressing a variety of street typologies and design elements found in various contexts around the world.

Women of Faith and the Quest for Spiritual Authenticity Sara Ashencaen Crabtree 2021-01-31 Drawn from over fifty-eight individual, in-depth, qualitative interviews with women of faith in Malaysia and Britain, *Women of Faith and the Quest for Spiritual Authenticity* is a multifaith, multicultural and cross-cultural comparative focus that explores women's religious expressions, as derived from practising Buddhists, Hindus, Christians, Muslims, Jews, Wiccans and Druids among others. Despite social advances towards women's emancipation and the lacerating critiques from feminist theologians across the Abrahamic religions and beyond, women's religious experiences remain submerged beneath the weight of patriarchal religious leadership and ongoing masculinised, dogmatic interpretations. Even feminism itself has yet to move the spiritual onto their main agenda of inequity in women's lives. This extensive, feminist research monograph challenges these exclusions to centre and amplify women's voices in speaking powerfully of their religious experiences, interpretations and practices. This is an ecumenical and entertaining ethnography where women's narratives and life stories ground faith as embodied, personal, painful, vibrant, diverse, illuminating and shared. This book will of interest not only to academics and students of the sociology of religion, feminist and gender studies, politics, ethnicity and Southeast Asian studies, but is equally accessible to the general reader broadly interested in faith and feminism.

Wain-Roy and the Invention of the Backhoe Lee Horton 2018-06-21 In 1947 Vaino J. Holopainen (Waino) and Roy E. Handy Jr. of the small town of Hubbardston, Massachusetts developed the world's first backhoe. This revolutionary invention that could dig and load by swinging side to side, was also the world's first all hydraulically actuated and controlled machine for digging. Vaino and Roy then formed Wain-Roy Corporation. Their grassroots contribution to the earth moving industry lead to the development of twenty-six major backhoe related break-through designs, including the tractor loader backhoe, which formed the worldwide multi-billion-dollar industry that we know today. The amazing story of Wain-Roy and the invention of the backhoe is one of inspiration, struggle, genius, success, theft and failure. Credit for the backhoe is often given to other larger outfits who no-doubt fueled the rise of its widespread use. Few people alive still remember the greatest triumphs and failures of the true inventors and innovators of first backhoe and the first all-hydraulic digger. Authors Lee Horton and Dave Willens, two engineers from Central Massachusetts, wanted to capture this fascinating history before it was lost to time.

Sweatshops on Wheels Michael H. Belzer 2000 Long hours, low wages, and unsafe workplaces characterized sweatshops a hundred years ago. These same conditions plague American trucking today. *Sweatshops on Wheels: Winners and Losers in Trucking Deregulation* exposes the dark side of government deregulation in America's interstate trucking industry. In the years since deregulation in 1980, median earnings have dropped 30% and most long-haul truckers earn less than half of pre-regulation wages. Work

weeks average more than sixty hours. Today, America's long-haul truckers are working harder and earning less than at any time during the last four decades. Written by a former long-haul trucker who now teaches industrial relations at Wayne State University, *Sweatshops on Wheels* raises crucial questions about the legacy of trucking deregulation in America and casts provocative new light on the issue of government deregulation in general.
