Women of Faith and the Quest for Spiritual Authenticity Sara Ashencaen Crabtree 2021-01-31 Drawn from over fifty-eight individual, in-depth, qualitative interviews with women of faith in Malaysia and Britain, *Women of Faith and the Quest for Spiritual Authenticity* is a

multifaith, multicultural and cross-cultural comparative focus that explores women's religious expressions, as derived from practising Buddhists, Hindus, Christians, Muslims, Jews, Wiccans and Druids among others. Despite social advances towards women's emancipation and the lacerating critiques from feminist theologians across the Abrahamic religions and beyond, women's religious experiences remain submerged beneath the weight of patriarchal religious leadership and ongoing masculinised, dogmatic interpretations. Even feminism itself has yet to move the spiritual onto their main agenda of inequity in women's lives. This extensive, feminist research monograph challenges these exclusions to centre and amplify women's voices in speaking powerfully of their religious experiences, interpretations and practices. This is an ecumenical and entertaining ethnography where women's narratives and life stories ground faith as embodied, personal, painful, vibrant, diverse, illuminating and shared. This book will of interest not only to academics and students of the sociology of religion, feminist and gender studies, politics, ethnicity and Southeast Asian studies, but is equally accessible to the general reader broadly interested in faith and feminism.

Advanced Tire Mechanics Yukio Nakajima 2019-04-03 This book highlights the mechanics of tire performance, offering detailed explanations of deriving basic equations for the fundamental properties of tires, and discussing ways to improve tire performance using these equations. It also compares the theory with practical measurements. The book commences with composite mechanics, which is the fundamental theory for belt and carcass tires, and covers classical, modified and discrete lamination theory. It then addresses the theory of tire shape and spring properties and the mechanics of tread pattern contact properties, as was well as the performance of various tires. This comprehensive book is a valuable resource for engineers involved in tire design and offers unique insights and examples of improvement of tire performances.

Mounted In The Cabin (MMM Gay Shifter Menage Romance) Blane Thomas His head tilted, looking down at me. His eyes found my bare ass, submissively up in the air. A growl rumbled from him as he fell onto me... Don't you dare dismiss me as another gay college dude with a drug problem. That's all true, but it's not all I am. I didn't have it hard growing up, but I made some bad decisions. Those lead to more bad decisions, and one day I get a phone call that makes everything else seem insignificant. My Dad had died, and I had no way to cope with that. So I fled to the secluded family cabin in the woods, where I hoped to find some kind of closure. Instead I found two handsome trespassers, and I thought the weekend might take a more interesting turn. Some crazy shit went down, and I found myself treating one of the trespassers for gunshot wounds, but somehow his wounds had healed. He opened his eyes, golden and terrifying. He growled, smelling his submissive prey. I had no chance. For adults only, contains graphic sexual content! Physical Modelling in Geotechnics, Volume 1 Andrew McNamara 2018-07-11 Physical Modelling in Geotechnics collects more than 1500 pages of peer-reviewed papers written by researchers from over 30 countries, and presented at the 9th International Conference on Physical Modelling in Geotechnics 2018 (City, University of London, UK 17-20 July 2018). The ICPMG series has grown such that two volumes of proceedings were required to publish all contributions. The books represent a substantial body of work in four years. Physical Modelling in Geotechnics contains 230 papers, including eight keynote and themed lectures representing the state-of-the-art in physical modelling research in aspects as diverse as fundamental modelling including sensors, imaging, modelling techniques and scaling, onshore and offshore foundations, dams and embankments, retaining walls and deep excavations, ground improvement and environmental engineering,

tunnels and geohazards including significant contributions in the area of seismic engineering. ISSMGE TC104 have identified areas for special attention including education in physical modelling and the promotion of physical modelling to industry. With this in mind there is a special themed paper on education, focusing on both undergraduate and postgraduate teaching as well as practicing geotechnical engineers. Physical modelling has entered a new era with the advent of exciting work on real time interfaces between physical and numerical modelling and the growth of facilities and expertise that enable development of so called 'megafuges' of 1000gtonne capacity or more; capable of modelling the largest and most complex of geotechnical challenges. Physical Modelling in Geotechnics will be of interest to professionals, engineers and academics interested or involved in geotechnics, geotechnical engineering and related areas. The 9th International Conference on Physical Modelling in Geotechnics was organised by the Multi Scale Geotechnical Engineering Research Centre at City, University of London under the auspices of Technical Committee 104 of the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE). City, University of London, are pleased to host the prestigious international conference for the first time having initiated and hosted the first regional conference, Eurofuge, ten years ago in 2008. Quadrennial regional conferences in both Europe and Asia are now well established events giving doctoral researchers, in particular, the opportunity to attend an international conference in this rapidly evolving specialist area. This is volume 1 of a 2-volume set.

Weapon Systems Handbook 2020-05-03 July 2019 Printed in BLACK AND WHITE The Army's Weapon Systems Handbook was updated in July 2019, but is still titled "Weapon Systems Handbook 2018." We are printing this in black and white to keep the price low. It presents many of the acquisition programs currently fielded or in development. The U.S. Army Acquisition Corps, with its 36,000 professionals, bears a unique responsibility for the oversight and systems management of the Army's acquisition lifecycle. With responsibility for hundreds of acquisition programs, civilian and military professionals collectively oversee research, development and acquisition activities totaling more than \$20 billion in Fiscal Year 2016 alone. Why buy a book you can download for free? We print this so you don't have to. We at 4th Watch Publishing are former government employees, so we know how government employees actually use the standards. When a new standard is released, somebody has to print it, punch holes and put it in a 3-ring binder. While this is not a big deal for a 5 or 10-page document, many DoD documents are over 400 pages and printing a large document is a time-consuming effort. So, a person that's paid \$25 an hour is spending hours simply printing out the tools needed to do the job. That's time that could be better spent doing mission. We publish these documents so you can focus on what you are there for. It's much more cost-effective to just order the latest version from Amazon.com. The Cruel Trade Clifford Peacock 2012 When a remote valley deep in East Africa is discovered, a handsome tribe, descended from the Queen of Sheba, is found living there. The Sultan of Zanzibar is keen to establish his presence. Tippu Tip, the Sultan's Machiavellian minister, orders a heavily armed expedition, led by the unwilling Captain Khalil, to seize the valley as a stepping-stone towards the sultan's ambition of ruling the whole of Africa. "The Cruel Trade" tells the story of a fascinating and brave expedition as it crosses the untamed savannah. A tale of betrayal and fear, but also courage and great love, this dramatic

story gives an illuminating insight into a turning point in the long and bloody history of East African slavery.

Differential Geometry and Lie Groups Jean Gallier 2020-08-18 This textbook explores advanced topics in differential geometry, chosen for their particular relevance to modern geometry processing. Analytic and algebraic perspectives augment core topics, with the authors taking care to motivate each new concept. Whether working toward theoretical or

applied questions, readers will appreciate this accessible exploration of the mathematical concepts behind many modern applications. Beginning with an in-depth study of tensors and differential forms, the authors go on to explore a selection of topics that showcase these tools. An analytic theme unites the early chapters, which cover distributions, integration on manifolds and Lie groups, spherical harmonics, and operators on Riemannian manifolds. An exploration of bundles follows, from definitions to connections and curvature in vector bundles, culminating in a glimpse of Pontrjagin and Chern classes. The final chapter on Clifford algebras and Clifford groups draws the book to an algebraic conclusion, which can be seen as a generalized viewpoint of the quaternions. *Differential Geometry and Lie Groups: A Second Course* captures the mathematical theory needed for advanced study in differential geometry with a view to furthering geometry processing capabilities. Suited to classroom use or independent study, the text will appeal to students and professionals alike. A first course in differential geometry is assumed; the authors' companion volume *Differential Geometry and Lie Groups: A Computational Perspective* provides the ideal preparation.

Bologna (Italy) - Wink Travel Guide Wink Travel Wink Travel Guide 2019-05-16 Although it is well known by Italians, it is less so among foreign visitors. Bologna is the capital and largest city of Emilia-Romagna (a region in northern Italy). Bologna is famed for the oldest university in the Western world, lively student population, exquisite food, typical brick terracotta-roofed architecture and porticos, theatre and nightlife. It is considered second only to Venice in beauty by many Italians and certainly has one of the largest and best preserved historic centers among Italian cities. Its architecture is noted for its palette of terracotta reds, burnt oranges, and warm yellows, hence the name of Bologna la rossa (Bologna the red). Wink Travel Guides introduce you to the best world travel destinations, in a clear and concise way, illustrated by photos.
