Light of the Northern Dancers Robin F. Gainey 2017-11-23 Fiery aristocrat, Eden Rose, uprooted from her native Scotland, has tended a foundering marriage and failing ranch at the corner of Crazy Woman Creek and the Powder River for a decade. Best friend, backwoods spitfire Maddie True, has her own woes a few miles away: widowed with a passel of young children, and caretaker to her addled father. Abandoned by her husband during the height of Wyoming Territory's worst drought in history, Eden depends on her inept brother, Aiden, to see her through the coming winter. "Light of the Northern Dancers is a powerful novel of a woman's journey, thought-provoking and unsettling in its authenticity and unflinching honesty." — Susan Wiggs, NYT Bestselling Romance Author "Half of what happens to us may have reason, the rest is chaos. the Northern Dancers, has this brand of existentialism. It's real and it doesn't let go!" — Tom Skerritt, Award Winning Actor, Writer, Director

Master Your Next Move, with a New Introduction Michael D. Watkins 2019-03-19 Your next professional move can make or break your career. Are you ready? In business, especially today, you are only as successful as your next career transition. Do well, and you'll be on the fast track to even more challenging roles. Fail, and you could irreparably harm your career--and your organization. In his international bestseller *The First 90 Days*, transition guru Michael D. Watkins outlined a set of basic principles for getting up to speed quickly in new professional roles. Since that book was published Watkins has worked with thousands of leaders, helping them to accelerate their transitions. These leaders posed challenging questions on how to apply the basic principles in real-life situations. The truth that emerged: the *First 90 Days* framework can be applied in every transition, but the way you apply it is entirely different when you have been promoted to a higher level than it is when you are joining a new organization or taking a role in a different country. *Master Your Next Move* answers a distinct need, focusing on the most common types of transitions leaders face and the unique challenges posed by each. Based on years of research, and now with a new introduction, this indispensable book explores eight crucial transitions virtually everyone encounters during their career, including promotion, leading former peers, onboarding into a new company, making an international move, and turning around a business in crisis. With real-world examples and many practical models and tools, *Master Your Next Move* is your guide to surviving and thriving as you make your next move . . . and every one after that.

Fish-stream Identification Guidebook British Columbia. Ministry of Forests 1995 The British Columbia Forest Practices Code specifies planning and operational guidelines for each phase of timber harvesting operations around streams, lakes, and wetlands. This guide describes suitable practices to meet the objectives of the riparian management regulations within the Code, specifically the requirement to correctly identify streams on the basis of fish presence in order to ensure the protection of fish populations and habitats during all phases of forest harvesting. The guide defines the classes of streams distinguished for aquatic ecosystem and riparian zone management, identifies fish species that define a stream as fish-bearing under the Code, and describes factors influencing fish-stream identification such as stream reach, gradient, stream size, natural barriers, and fisheries sensitive zones. The guide concludes with

methods for identifying fish streams, including measurement, sampling, data recording, and mapping procedures.

Total Performers Charles Morris 2015-04-16 The 1960s was arguably the most important decade for drag racing. It had exciting cars, thrilling races, rapidly changing technology, and most important, factory participation. Among the best high-performance cars and engines were those coming from Dearborn, Michigan. Ford Motor Company's "Total Performance Years" saw a breakthrough as Ford's drag racing program helped the younger, performance- and style-conscious consumer begin receiving some recognition on the street, and of course, generate sales in the showroom. Factory participation in drag racing pushed the envelope for high-performance developments. In this new paperback edition, Ford's FE-series engine, Police Interceptors, GT 390, 427 SOHC, 428 Cobra Jet, and Boss 429 are all covered in detail. See the cars and the drivers that made them famous: Dick Brannan's Goldfinger, Bill Lawton's Mystery Mustang, "Dyno Don" Nicholson's Eliminator Comet, Gas Ronda's stretched Mustang, and Al Joniec's Batcar. Follow the progression from the early Starliners to the factory lightweight Galaxies to the Thunderbolts, Shelby Cobras, Mustangs, and more.

Accomplished journalist and lifelong Ford aficionado Charles Morris takes you back to the "Total Performance Years" through first-hand accounts as well as with more than 400 rare photographs. A drag racer since 1966, Morris has been a crewmember for a Top Alcohol Funny Car and a Pro/Stock team, and has run cars in Stock, Super Stock, and Nostalgia Super Stock classes. This book is a must-read for all drag racing fans, not just Ford enthusiasts.

Montessori Madness Trevor Eissler 2009 "We know we need to improve our traditional school system, both public and private. But how? More homework? Better-qualified teachers? Longer school days or school years? More testing? More funding? No, no, no, no, and no. *Montessori Madness!* explains why the incremental steps politicians and administrators continue to propose are incremental steps politicians and administrators continue to propose are incremental steps in the wrong direction. The entire system must be turned on its head. This book ask parents to take a look--one thirty-minute observation--at a Montessori school. Your picture of what educations should look like will never be the same"--Back cover.

Go Like Hell Albert J. Baime 2009 By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the Assassin" because so many drivers perished while racing them. *Go Like Hell* tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. *Go Like Hell* transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the "pilots" who would drive them to victory, or doom.

Conservation Biology for All Navjot S. Sodhi 2010-01-08 *Conservation Biology for All* provides cutting-edge but basic conservation science to a global readership. A series of authoritative chapters have been written by the top names in conservation biology with the principal aim of disseminating cutting-edge conservation knowledge as widely as possible. Important topics such as balancing conversion and human needs, climate change, conservation planning, designing and analyzing conservation research, ecosystem services, endangered species management, extinctions, fire, habitat loss, and invasive species are covered. Numerous textboxes describing additional relevant material or case studies are also included. The global biodiversity crisis is now unstoppable; what can be saved in the developing world will require an educated constituency in both the developing and developed world. Habitat loss is particularly acute in developing countries, which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found. Sadly, developing world conservation scientists have found it difficult to access an authoritative textbook, which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest. There is now an urgent need to educate the next generation of scientists in developing countries, so that they are in a better position to protect their natural resources.

Profit Without Honor Stephen M. Rosoff 1998 *Profit Without Honor: White-Collar Crime and the Looting of America* seeks to elucidate a very broad subject: white-collar crime. How broad? Its domain stretches from the small price-gouging merchant to the huge price-fixing cartel. It can breed in an antiseptic hospital or a toxic dump. It is at home on Main Street, Wall Street, Madison Avenue, and countless other addresses - including, at times, 1600 Pennsylvania Avenue.
