Carlos Villa Mark Dean Johnson 2022-01-25 "Carlos Villa has been described as the preeminent Filipino American artist--a legend in artistic circles for his groundbreaking approaches and his influence on countless artists--but he remains little known to many fans and scholars of modern and contemporary art. Carlos Villa: Worlds in Collision is the first museum retrospective of his work, presented at the San Francisco Art Institute and the Asian Art Museum of San Francisco. Villa was trained at the San Francisco Art Institute in the 1950s as an abstract expressionist, and over time he transformed his practice to address issues of ethnic and cultural diversity. He concurrently assumed a leadership role in 'Third World' and 'multicultural' international art movements, and his large-scale works reference non-Western traditions, including tattoo, scarification, ritual, and ceremony. He was also an important theorist, curator, and organizer of public forums that he called 'actions.' This book traces the arc of his career from 1969 until his death in 2013, with emphasis on his feathered works from the 1970s, as well as later works that address aspects of the history of Filipinos in the United States. It illuminates the social and cultural roots--and global importance--of Villa's art and teaching career as he sought to forge a new kind of art-world inclusion that reflected his own experience, commitment to diversity, and boundary-bending imagination"--

You Can Never Have Enough... Roses Marcos Johnson 2013-06-11 "About two years ago, the poems began arriving in Joaquin Phoenix's mailbox, small batches of them, day after day, for weeks -- poetry that was unsolicited, previously unpublished and rawer than steak tartare. Written by Marcos Johnson, a former TV casting agent with an extreme personality, their jagged stanzas spoke of bruised romanticism and

hardscrabble street life. The actor found them impossible to put out of mind." LA Times 2007

Testimonios: Stories of Latinx and Hispanic Mathematicians Pamela E. Harris 2021-08-16 Testimonios brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community. Starting with childhood and family, the authors recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians. Testimonios seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.

Fostering Integrity in Research National Academies of Sciences, Engineering, and Medicine 2018-01-13 The integrity of knowledge that emerges from research is based on individual and collective adherence to core values of objectivity, honesty, openness, fairness, accountability, and stewardship. Integrity in science means that the organizations in which research is conducted encourage those involved to exemplify these values in every step of the research process. Understanding the dynamics that support "or distort" practices that uphold the integrity of research by all participants ensures that the research enterprise advances knowledge. The 1992 report Responsible Science: Ensuring the Integrity of the Research Process evaluated issues related to scientific responsibility and the conduct of research. It provided a valuable service in describing and analyzing a very complicated set of issues, and has served as a crucial basis for thinking about research integrity for more than two decades. However, as experience has accumulated with various forms of research misconduct, detrimental research practices, and other forms of misconduct, as subsequent empirical research has revealed more about the nature of scientific misconduct, and because technological and social changes have altered the environment in which science is conducted, it is clear that the framework established more than two decades ago needs to be updated. Responsible Science served as a valuable benchmark to set the context for this most recent analysis and to help guide the committee's thought process. Fostering Integrity in Research identifies best practices in research and recommends practical options for discouraging and addressing research misconduct and detrimental research practices.

Stories of the Vikings Mary MacGregor 2018-03-01 On a summer day nearly twelve hundred years ago, three ships with bright red sails drew near to one of the little ports of the Dorset coast in the south of England. The townsfolk saw the ships, and paying no heed to the bright sails, said carelessly one to another, 'The merchantmen will be in port to-day.' And the harbour-master gathered together a few of his men and hastened to the quay. For he, too, had seen the ships, and, as in duty bound, he went to meet them, to demand from the captains the port taxes which were lawfully due to the king. But townsfolk and harbour-master alike had made a grievous mistake that summer day. For, as they soon discovered to their cost, and as the red sails might have forewarned them, the three ships were no peaceful merchantmen...

Giordano 2008-07-03 Offering a solid introduction to the entire modeling process, A FIRST COURSE IN MATHEMATICAL MODELING, 4th Edition delivers an excellent balance of theory and practice, giving students hands-on experience developing and sharpening their skills in the modeling process. On the Same Track Carol Corbett Burris 2014-03-18 A public school principal's account of the courageous leaders who have dismantled the tracking systems in their schools in order to desegregate classrooms What would happen if a school eliminated the "tracks" that rank students based on their perceived intellectual abilities? Would low-achieving students fall behind and become frustrated? Would their higher-achieving peers suffer from a "watered-down" curriculum? Or is tracking itself the problem? A growing body of research shows that tracking doesn't increase learning for the minority and low-income students who are overrepresented in low-track classrooms. This de facto segregation has led many civil rights advocates to argue that tracking is turning back the clock on equal education. As a principal at a New York high school, Carol Corbett Burris believed that the curriculum for the best students was the best curriculum for all. She helped lead a bold plan to eliminate tracking from her school, and the results couldn't have been further from the doom-and-gloom scenarios of tracking proponents. Instead, there was a dramatic improvement in the achievement of all students, across racial and socioeconomic divisions, and a near elimination of the achievement gap. Today, due to those efforts, International Baccalaureate English is the twelfth-grade curriculum for South Side students, and all students take the same challenging courses, together, to prepare them for college. In *On the Same Track*, Burris draws on her own experience, on the experiences of other schools, and on the latest research to make an impassioned case for detracking. Not only does the practice of tracking fail to benefit lower-tracked students, as Burris shows, but it also results in the resegregation of classrooms. Furthermore, she argues that many of today's popular reforms emanate from the same "sort and select" mentality that reinforces social stratification based on race and class. *On the Same Track* is a rousing, controversial, and yet optimistic account of how we need to change our assumptions and policies if we are to live up to the promise of democratic public education. Only by holding all students to the same high standards can we ensure that all have the same opportunity to live up to their full potential.

Dreams Olive Schreiner 2022-11-13 *Dreams* is a collection of beautifully written short stories based on author's dreams and life on a farm in South Africa. In *Dreams* depicts Olive Schreiner her fascinating looks on the world. Olive Schreiner (1855 -1920) was a South African author, anti-war campaigner and intellectual. Since the late 20th century, scholars have also credited Schreiner as an advocate for the Afrikaners, and other South African groups who were excluded from political power for decades, such as indigenous Blacks, Jews and Indians. Although she showed interest in socialism, pacifism, vegetarianism and feminism amongst other topics, her views escaped restrictive categorizations. Her published works and other surviving writings promote implicit values such as moderation, friendship, and understanding amongst all peoples, and avoid the pitfalls of political radicalism.
