**Multiple Objective Decision Making — Methods and Applications** C.-L. Hwang 2012-12-06 Decision making is the process of selecting a possible course of action from all the available alternatives. In almost all such problems the multiplicity of criteria for judging the alternatives is pervasive. That is, for many such problems, the decision maker (DM) wants to attain more than one objective or goal in selecting the course of action while satisfying the constraints dictated by environment, processes, and resources. Another characteristic of these problems is that the objectives are apparently non commensurable. Mathematically, these problems can be represented as: (1. 1 ) subject to:  $g_i(\sim) \sim 0, \dots, \dots$  ! where  $\sim$  is an n dimensional decision variable vector. The problem consists of n decision variables, m constraints and k objectives. Any or all of the functions may be nonlinear. In literature this problem is often referred to as a vector maximum problem (VMP). Traditionally there are two approaches for solving the VMP. One of them is to optimize one of the objectives while appending the other objectives to a constraint set so that the optimal solution would satisfy these objectives at least up to a predetermined level. The problem is given as: Max  $f. \sim) 1$  (1. 2) subject to: where at is any acceptable predetermined level for objective t. The other approach is to optimize a super-objective function created by multiplying each 2 objective function with a suitable weight and then by adding them together.

**Japanese Demon Lore** Noriko T. Reider 2010-09-30 Oni, ubiquitous supernatural figures in Japanese literature, lore, art, and religion, usually appear as demons or ogres. Characteristically threatening, monstrous creatures with ugly features and fearful habits, including cannibalism,

they also can be harbingers of prosperity, beautiful and sexual, and especially in modern contexts, even cute and lovable. There has been much ambiguity in their character and identity over their long history. Usually male, their female manifestations convey distinctively gendered social and cultural meanings. Oni appear frequently in various arts and media, from Noh theater and picture scrolls to modern fiction and political propaganda. They remain common figures in popular Japanese anime, manga, and film and are becoming embedded in American and international popular culture through such media. Foley 2004-04-29 In *The Case against Assisted Suicide: For the Right to End-of-Life Care*, Dr. Kathleen Foley and Dr. Herbert Hendin uncover why pleas for patient autonomy and compassion, often used in favor of legalizing euthanasia, do not advance or protect the rights of terminally ill patients. Incisive essays by authorities in the fields of medicine, law, and bioethics draw on studies done in the Netherlands, Oregon, and Australia by the editors and contributors that show the dangers that legalization of assisted suicide would pose to the most vulnerable patients.
