**Image, History and Memory** Michał Haake 2022-02-22 This book discusses the active relationship among the mechanics of memory, visual practices, and historical narratives. Reflection on memory and its ties with historical narratives cannot be separated from reflection on the visual and the image as its points of reference which function in time. This volume addresses precisely that temporal aspect of the image, without reducing it to a neutral trace of the past, a mnemotechnical support of memory. As a commemorative device, the image fixes, structures, and crystalizes memory, turning the view of the past into myth. It may, however, also stimulate, transform, and update memory, functioning as a matrix of interpretation and understanding the past. The book questions whether the functioning of the visual matrices of memory can be related to a particular historical and geographical scope, that is, to Central and Eastern Europe, and whether it is possible to find their origin and decide if they are just local and regional or perhaps also Western European and universal. It focuses on the artistic reflection on time and history, in the reconstructions of memory due to change of frontiers and political regimes, as well as endeavours to impose some specific political structure on territories which were complex and mixed in terms of national identity, religion and social composition. The volume is ideal for students and scholars of memory studies, history and visual studies.

**National Intellectual Capital and the Financial Crisis in Denmark, Finland, Iceland, Norway, and Sweden** Carol Yeh-Yun Lin 2013-11-19 In the first decade of the twenty-first century, the biggest event of worldwide proportion was the 2008 global financial crisis, which was caused primarily by ineffective governance, failed surveillance systems, and implementation flaws. While fiscal and monetary policies succeeded in pulling many countries out of a financial freefall, most economies have performed beneath pre-recession levels as governments continued to struggle with their finances. Examining the financial crisis from the viewpoint of intangible assets provides a different perspective from traditional economic approaches. National Intellectual Capital (NIC), comprised mainly of human capital, market capital, process capital, renewal capital, and financial capital, is a valuable intangible asset and a key source of national competitive advantage in today's knowledge economy. The authors—pioneers in the field—present extensive data and a rigorous conceptual framework to analyze the connections between the global financial crisis and NIC development. Covering the period from 2005 to 2010 across 48 countries, the authors establish a positive correlation between NIC and GDP per capita and consider the impact of NIC investment for short-term recovery and long-term risk control and strategy formulation. Each volume in a series of SpringerBriefs on NIC and the financial crisis provides in-depth coverage of the impact of the crisis, the aftermath, future prospects, and policy implications for a regional cluster. This volume focuses on Denmark, Finland, Iceland, Norway, and Sweden.

**Religious Innovation in a Global Age** George N. Lundskow 2017-02-10 Certain timeless questions rise and fall through changing social conditions, scientific advances, and cultural variation—who am I? How should I live? What happens when I die? In modern society, traditions no longer integrate the individual into a larger spiritual community, and so movements have risen to address the crisis of meaning in a rapidly changing world. This collection of essays, while considering variables of work, class, race, and gender, theoretically and empirically examines how diverse groups are trying to restore a sense of meaning through religious innovation. The first group of essays considers new developments in theory, framing critical inquiry into recent developments in religion and the larger quest for meaning. The second section examines grass roots emancipation movements, which seek an expanded role for the individual in both belief and practice. Topics addressed include the dialectic between religious and secular values and norms,

anti-Semitism, new evangelism, Neopaganism on the internet, Max Horkheimer's critical theory of religion, Christian speed/thrash metal music, Islamic fundamentalism, modernity and the role of women, French tourist destination Rocamadour's competition between the Catholic shrine and secular attractions, developments within the Polish Roman Catholic Church, the Finnish Satanism scare of 1999, and Islam and politics in Turkey. A bibliography completes each essay. Instructors considering this book for use in a course may request an examination copy here.

**Testing 3, 2, 1** Michael Lawrence 2020-03-23 Testing 3, 2, 1 is the story of how Australian education fell behind the world's best and how Finland came to lead. It is also a guide to how some of Finland's ideas can be used by teachers and schools to begin to reverse the current malaise of Australia's education system. Part memoir, part investigative journalism, part call-to-action, this easy-to-read and highly compelling plea for an improved education system can't be ignored ... Lawrence reminds us that we can (and must) do better. - Jared Cooney Horvath PhD, Educational Neuroscientist, Melbourne Graduate School of Education, University of Melbourne. **Hidden Hand** Clive Hamilton 2021-07-03 Headline: The Globe and Mail: Legal challenge halts Canadian, U.S. and U.K. release of book critical of Chinese Communist Party by Robert Fife That said it all. The hands of the Chinese Communist Party were going on the offence. The 48 Group Club a China friendly group of former UK ambassadors and Prime Ministers were embarrassed by their connections to a Club founded by key members of the Chinese Communist Party of Britain who's chair Stephen Perry suggested that China's approach to world order and rule was superior to democracy and the UK should embrace them. Asked if he believed the lawsuit was an effort by the Chinese government to stop the publication of his book, Mr. Hamilton said: "I have no evidence of that, although it should be noted that the Chinese government has used lawfare in the past." Lawfare is the use of legal action as part of a campaign against a target. Governments around the world are in the early stages of a repositioning of power, as China rises and the United States is drawn into direct competition. However, some are beginning to wonder whether, for all of the economic benefits, engaging with China carries unseen dangers. The Chinese Communist Party is now determined to reshape the world in its image. The party is not interested in democracy. It divides the world into those who can be won over and enemies. They have already lured many leaders to their corner; others are weighing up a devil's bargain. Through its exercise of 'sharp power,' the party is weakening global institutions, aggressively targeting individual corporations, and threatening freedom of expression from the arts to academia. At the same time, security services are increasingly worried about incursions into our communications infrastructure. Indeed, the vaunted Great Firewall is a temporary measure, only necessary until the party has transformed the global conversation. In December 2019, the CCP's obsession with social control led it to suppress expert warnings about the coronavirus outbreak in Wuhan. Most alarming for the West was the active collaboration of the WHO in spreading the CCP's version of events. It was a shocking example of the widespread co-optation of global institutions by the CCP, as described in Hidden Hand. As soon as Beijing thought it had the virus under control, it began a global propaganda blitz, presenting China's authoritarian system as a model for the rest of the world. Western media and pundits soon began echoing the Party line. Hidden Hand is a detailed and devastating expose of Chinese Communist Party influence in the West, including Canada. It could not arrive at a better time in Canada, with relations between Ottawa and Beijing reaching breaking point after two years of mounting tension. China's bullying behaviour, and the mobilising of people loyal to the Chinese Communist Party on the streets of Canada's cities, has caused deep disquiet among Canadians. But the government seems paralyzed. Hidden Hand shows how Canada's political, business, academic and cultural elites have over many years been co-opted by the Chinese Communist Party and its agencies. They are confused about what is in Canada's national interests and frequently do Beijing's bidding. Hidden Hand shows how the Chinese Communist Party represents a profound threat to Western democracy. It's vital reading for Canadians who want to understand what is really happening, and points to a way of carving out a new diplomatic course with China. But the question remains: Does the government have the will to stand up to Beijing and its proxies in Canada or is it too late?

**The Human Rights-Based Approach to Higher Education** Jane Kotzmann 2018-04-05 A human right to higher education was included in the International Covenant on Economic Social and Cultural Rights (ICESCR), which came into force in 1976. Yet the world has changed significantly since the ICESCR was drafted. State legislation and policies have generally followed a neoliberal trajectory, shifting the perception of higher education from being a public good to being a commodity able to be bought and sold. This model has been criticized, particularly because it generally reinforces social inequality. At the same time, attaining higher education has become more important than ever before. Higher education is a prerequisite for many jobs and those who have attained higher education enjoy improved life circumstances. This book seeks to determine: Is there still a place for the human right to higher education in the current international context? In seeking to answer this question, this book compares and contrasts two general theoretical models that are used to frame higher education policy: the market-based approach and the human rights-based approach. In the process, it contributes to an understanding of the likely effectiveness of market-based versus human rights-based approaches to higher education provision in terms of teaching and learning. This understanding should enable the development of more improved, sophisticated, and ultimately successful higher education policies. This book contends that a human rights-based approach to higher education policy is more likely to enable the achievement of higher education purposes than a market-based approach. In reaching this conclusion, the book identifies and addresses some strategic considerations of relevance for advocates of a human rights-based approach in this context.
