Murder in Grosse Pointe Park Steve Miller
2015-12-01 Investigative reporter, and author of *Nobody's Women*, Steve Miller makes a thoroughly researched inquiry into a murder that rocked the privileged world of Grosse Pointe, Michigan. Bob Bashara: husband, father, Rotary Club president and community leader. Bob Bashara: slumlord, philanderer and BDSM enthusiast. Did he also hire a hit on his wife? Jane Bashara lived in Grosse Pointe Park, one of Metro Detroit's wealthiest communities, when she was strangled to death in her own garage by

local handyman Joe Gentz. When Joe turned himself in, he told the cops everything—including how he was hired for a hit by Jane's husband. His payment: \$2,000 and a used Cadillac. Born into one of Michigan's elite families, Bob was sweeping out the back alley of a property he owned when his wife was being killed. He made sure the bartenders at the Hard Luck Lounge saw him there at the time of her murder. He'd often brought girlfriends by the same bar, and for the last year had been seen with one Rachel Gillett—riding around town in her convertible, even showing up at BDSM events in the suburbs of Detroit. When Joe Gentz confessed, his 67 IQ and barfly reputation made him less than credible. Bob successfully denied any part in his wife's murder. But he couldn't deny his attempt to have Joe killed in prison. Includes photos.

Well, Dave Barry wishes that he did, too. But that hasn't stopped him from writing this book. In it, Dave explores (as only he

can) such topics as: • How the U.S. economy works, including the often overlooked role of Adam Sandler • Why it is not a good idea to use squirrels for money • Strategies that will give you the confidence you need to try for a good job, even though you are—let's be honest—a no-talent loser • How corporate executives, simply by walking into their offices, immediately become much stupider • An absolutely foolproof system for making money in the stock market, requiring only a little effort (and access to time travel) • Surefire tips for buying and selling real estate, the key being: Never buy—or, for that matter, sell—real estate • How to minimize your federal taxes, safely and legally, by cheating • Why good colleges cost so much, and how to make sure your child does not get into one • How to reduce the cost of your medical care by basically not getting any • Estate planning, especially the financial benefits of an early death • And many, many pictures of Suze Orman But that's only the beginning! Dave has also included in this book all of the important points from a book written by Donald Trump, so you don't have to read it yourself. Plus he explains how to tip, how to negotiate for everything (including bridge tolls), how to argue with your spouse about money, and how much allowance to give your children (three dollars is plenty). He also presents, for the first time in print anywhere, the Car Dealership Code of Ethics ("Ethic Seven: The customer is an idiot"). Also, there are many gratuitous references to Angelina Jolie naked. You can't afford not to buy this book! Probably you need several copies. What kind of financial shape are you in right now? This scientific quiz will show you. Be honest in your answers: If you lie, you'll only be lying to yourself! The place to lie is on your federal tax return. What is your annual income? 1. Here We Are Now Jasmine Warga 2017-11-07 A book about love, loss, and the power of music, perfect for fans of Nick Hornby and Fangirl. Taliah Sahar Abdallat lives and breathes music. Songs have always helped Tal ease the pain of never having known her father. Her mother, born in Jordan and very secretive about her past, won't say a word about who her dad really was. But when Tal finds a shoebox full of old letters from Julian Oliver—yes, the indie rock star Julian Oliver—she begins to piece the story together. She writes to Julian, but after three years of radio silence, she's given up hope. Then one day, completely out of the blue, Julian shows up at her doorstep, and Tal doesn't know whether to be furious or to throw herself into his arms. Before she can decide, he asks her to go on a trip with him to meet her long-estranged family and to say good-bye to his father, her grandfather, who is dying. Getting to know your father after sixteen years of estrangement doesn't happen in one car ride. But as Tal spends more time with Julian and his family, she begins to untangle her parents' secret past, and discovers a part of herself she never recognized before. By the acclaimed author of *My Heart and Other Black Holes*, this is an intergenerational story of family and legacy and the way love informs both of those things. It's about secrets and the debt of silence. It's about the power of songs. And most of all, it's about learning how to say hello. And good-bye.

You Can Date Boys When You're Forty Dave Barry 2014-03-04 A brilliantly funny exploration of the twin mysteries of parenthood and families from the Pulitzer Prize winner and New York Times–bestselling author of *Insane City*. In his New York Times–bestselling *I'll Mature When I'm Dead*, Dave Barry embarked on the treacherous seas of adulthood, to hilarious results. What comes next? Parenthood, of course, and families. In uproarious, brand-new pieces, Barry tackles everything from family trips, bat mitzvah parties and dating (he's serious about that title: "When my daughter can legally commence dating—February 24, 2040—I intend to monitor her closely, even if I am deceased") to funeral instructions ("I would like my eulogy to be given by William Shatner"), the differences between male and female friendships, the deeper meaning of *Fifty Shades of Grey*, and a father's ultimate sacrifice: accompanying his daughter to a Justin Bieber concert ("It turns out that the noise teenaged girls make to express happiness is the same noise they would make if their feet were being gnawed off by badgers"). Let's face it: families

not only enrich our lives every day, they drive us completely around the bend. Thank goodness we have Dave Barry as our guide!

Shopping Malls and Other Sacred Spaces

Jon Pahl 2008-12-29 Christian historian Sidney Mead has observed: "In America space has played the part that time has played in older cultures of the world." In *Shopping Malls and Other Sacred Spaces*, Jon Pahl examines this provocative statement in conversation with what he calls the "spatial character" of American theology. He argues that places are always imaginatively constructed by the human beings who inhabit them. Sometimes this spatial theology works to our benefit; other times it poses spiritual risks. What happens when our banal "clothing of the sacred" violates our genuine need for comfort and intimacy? Or when we remember that the fleeting pleasures of a shopping trip or a Disneyland escape are designed to fill someone else's pocket rather than the spiritual emptiness in our own hearts? Pahl develops several ways to "clothe the divine from within the Christian tradition." He introduces a theology of place that reveals aspects of God's character through biblical metaphors drawn from physical spaces, such as the true vine, the rock, and the living water. Accessible and thought provoking, this enlightening book provides a better grasp of our particularly American way of lending religious significance to spaces of all kinds.

Merry Wives and Others Penelope Fritzer 2010-06-28 In many ways, the history of domestic humor writing is also a history of domestic life in the twentieth century. For many years, domestic humor was written primarily by females; significant contributions from male writers began as times and family structures changed. It remains timeless because of its basis on the relationships between husbands and wives, parents and children, houses and inhabitants, pets and their owners, chores and

their doers, and neighbors. This work is a historical and literary survey of humorists who wrote about home. It begins with a chapter on the social context of and attitudes toward traditional domestic roles and housewives. The following chapters, beginning with the 1920s and continuing through today, cover the different time periods and the foremost American domestic humorists, and the humor written by surrogate parents, grown children about their childhood families, husbands, and Canadian and English writers. Also covered are the differences among various writers toward traditional domestic roles--some, like Erma Bombeck and Judith Viorst, embraced them, while others, like Caryl Kristenson and Marilyn Kentz, resisted them. Common themes, such as the isolation and competitiveness of housework, home as an idealized metaphysical goal and ongoing physical challenge, and the urban, suburban, and rural life, are also explored.

Beautiful Black Holes For Kids! K. Bennett 2016-03-17 Introduction Space, the final frontier... to explore strange new worlds, to seek out new life, and new civilizations, to boldly go where no man has gone before. ~ Gene Roddenberry *** The universe is full of surprises! We can find amazing things like galaxies, planets, comets, asteroids, moons, meteorites, and more! One of the strangest objects we can find in space is called a... black hole. Have you ever heard of black holes? What do you know about them? Let's learn more! Black holes are dark areas in space with strong gravity. Not all black holes are black and we cannot see them, but we know they are there. How do we know they exist even though we can't see them? Scientists study the things that happen around a black hole, and that tells them a black hole is there. The force of a black hole is so strong light cannot escape. Do you know what happens to light when it gets near a black hole? Strong gravity pulls light and everything else into the center. It is so strong that nothing escapes the powerful force, and everything falls in! Black holes come in lots of different sizes. Some are big, and some are small. Some black holes are so big; they are called supermassive black holes. That's a big, big hole! Black holes affect not only space but time too. How so? Did you know time changes when you get near a

black hole? Yes, it does! This is because of Einstein's theory of relativity. Let's find out how black holes work and what else we can learn about this mysterious force in the universe!

Black Holes & Time Warps: Einstein's Outrageous Legacy (Commonwealth Fund Book Program) Kip Thorne 1995-01-17 Winner of the 2017 Nobel Prize in Physics Ever since Albert Einstein's general theory of relativity burst upon the world in 1915 some of the most brilliant minds of our century have sought to decipher the mysteries bequeathed by that theory, a legacy so unthinkable in some respects that even Einstein himself rejected them. Which of these bizarre phenomena, if any, can really exist in our universe? Black holes, down which anything can fall but from which nothing can return; wormholes, short spacewarps connecting regions of the cosmos; singularities, where space and time are so violently warped that time ceases to exist and space becomes a kind of foam; gravitational waves, which carry symphonic accounts of collisions of black holes billions of years ago; and time machines, for traveling backward and forward in time. Kip

Thorne, along with fellow theorists Stephen Hawking and Roger Penrose, a cadre of Russians, and earlier scientists such as Oppenheimer, Wheeler and Chandrasekhar, has been in the thick of the quest to secure answers. In this masterfully written and brilliantly informed work of scientific history and explanation, Dr. Thorne, a Nobel Prize-winning physicist and the Feynman Professor of Theoretical Physics Emeritus at Caltech, leads his readers through an elegant, always human, tapestry of interlocking themes, coming finally to a uniquely informed answer to the great question: what principles control our universe and why do physicists think they know the things they think they know? Stephen Hawking's *A Brief History of Time* has been one of the greatest best-sellers in publishing history. Anyone who struggled with that book will find here a more slowly paced but equally mind-stretching experience, with the added fascination of a rich historical and human component. Winner of the Phi Beta Kappa Award in Science.

[The Book Lover's Guide to Florida](#) Kevin M. McCarthy 1992 "Here is the book lover's literary tour of Florida, an exhaustive survey of writers, books, and literary sites in every part of the state. The state is divided into ten areas and each one is described from a literary point of view. You will learn what authors lived in or wrote about a place, which books describe the place, what important movies were made there, even the literary trivia which the true Florida book lover will want to know. You can use the book as a travel guide to a new way to see the state, as an armchair guide to a better understanding of our literary heritage, or as a guide to what to read next time you head to a bookstore or library."--Publisher.

[Dave Barry's Complete Guide to Guys](#) Dave Barry 2010-07-28 "Dave Barry is one funny human." --San Francisco Examiner For thousands of years, women have asked themselves: What is the deal with guys, anyway? What are they thinking? The answer, of course, is: virtually nothing. Deep down inside, guys are extremely shallow. But that has not stopped Dave Barry from writing an entire book about them. If you're a guy--or if you're attempting to share a remote control with one--you need this

book, because it deals frankly and semi-thoroughly with such important guy issues as: Scratching The role of guys in world history, including the heretofore-unknown relationship between the discovery of North America and golf Why the average guy can remember who won the 1960 World Series, but not necessarily the names of all his children The Noogie Gene Why guys cannot simultaneously think and look at breasts Secret guy orgasm-delaying techniques, including the Margaret Thatcher Method Why guys prefer to believe that there is no such thing as a prostate And much, much more "Whether you're a guy--or attempting to share a bathroom with one--Barry has some wacky words of wisdom for you." --USA Today
