Sheep on a Ship Nancy Shaw 2010-02-15
Following the beloved Sheep in a Jeep, this illustrated children's book follows the rhyming misadventure of zany sheep on a pirate ship. It's time for bed but the sheep just can't settle down. Never fear, a trusty sheepdog is here to help. But what will it take to get these restless sheep to bed? A hug? A blanket? A drink of water? Will this dedicated collie ever get these bleating sheep to sleep? Perhaps only a daring pirate adventure will do the trick... From the author and illustrator behind Sheep in a Jeep, this

sweet and silly bedtime tale is perfect for reading aloud to a demanding little one who doesn't want to go to bed. "The spare text is easily mastered by the beginning reader, while adults reading this aloud will appreciate the tongue-twisters and rollicking rhymes."—Publishers Weekly

Strategic Management R. Edward Freeman
2010-03-11 Strategic Management: A Stakeholder Approach was first published in 1984 as a part of the Pitman series in Business and Public Policy. Its publication proved to be a landmark moment in the development of stakeholder theory. Widely acknowledged as a world leader in business ethics and strategic management, R. Edward Freeman's foundational work continues to inspire scholars and students concerned with a more practical view of how business and capitalism actually work. Business can be understood as a system of how we create value for stakeholders. This worldview connects business and capitalism with ethics once and for

Civic Media Eric Gordon 2016-06-10

Examinations of civic engagement in digital culture—the technologies, designs, and practices that support connection through common purpose in civic, political, and social life.

Countless people around the world harness the affordances of digital media to enable democratic participation, coordinate disaster relief, campaign for policy change, and strengthen local advocacy groups. The world watched as activists used social media to organize protests during the Arab Spring, Occupy Wall Street, and Hong Kong's Umbrella Revolution. Many governmental and community organizations changed their mission and function as they adopted new digital tools and practices. This book examines the use of “civic media”—the technologies, designs, and practices

that support connection through common purpose in civic, political, and social life. Scholars from a range of disciplines and practitioners from a variety of organizations offer analyses and case studies that explore the theory and practice of civic media. The contributors set out the conceptual context for the intersection of civic and media; examine the pressure to innovate and the sustainability of innovation; explore play as a template for resistance; look at civic education; discuss media-enabled activism in communities; and consider methods and funding for civic media research. The case studies that round out each section range from a “debt resistance” movement to government service delivery ratings to the “It Gets Better” campaign aimed at combating suicide among lesbian, gay, bisexual, transgender, and queer youth. The book offers a valuable interdisciplinary dialogue on the challenges and opportunities of the increasingly influential space of civic media.

managers. Finances affect nearly every aspect of life in the United States. But many people feel overwhelmed by their financial situations, and they don't know where to go for help. As a case manager, you're in a unique position to provide that help. Clients already know you and trust you, and in many cases, they're already sharing financial and other personal information with you. The financial stresses your clients face may interfere with their progress toward other goals, and providing financial empowerment information and tools is a natural extension of what you are already doing. What is "financial empowerment" and how is it different from financial education or financial literacy? Financial education is a strategy that provides people with financial knowledge, skills, and resources so they can get, manage, and use their money to achieve their goals. Financial education is about building an individual's knowledge, skills, and capacity to use resources and tools, including financial products and

services. Financial education leads to financial literacy. Financial empowerment includes financial education and financial literacy, but it is focused both on building the ability of individuals to manage money and use financial services and on providing access to products that work for them. Financially empowered individuals are informed and skilled; they know where to get help with their financial challenges. This sense of empowerment can build confidence that they can effectively use their financial knowledge, skills, and resources to reach their goals. We designed this toolkit to help you help your clients become financially empowered consumers. This financial empowerment toolkit is different from a financial education curriculum. With a curriculum, you are generally expected to work through most or all of the material in the order presented to achieve a specific set of objectives. This toolkit is a collection of important financial empowerment information and tools you can access as needed

based on the client's goals. In other words, the aim is not to cover all of the information and tools in the toolkit - it is to identify and use the information and tools that are best suited to help your clients reach their goals.

research into young adulthood and separating fact from fiction about this important life phase. Alan Reifman shows how today's youth are taking more time to enter traditional adult roles, and explores the benefits and disadvantages of this gradual emergence into adulthood. This essential textbook navigates the research that reveals the substantial variety in young people's paths to adulthood. It covers the spectrum of the young adult experience, examining the influence that parents have on their grown children's progress and identity as adults, and considering the impact of traditional milestones such as higher education, establishing a career, forming romantic relationships and becoming a parent. It examines key topics including mental health in emerging adults and the likelihood of substance abuse, and how young adults might reach out into the community through volunteerism, religious involvement and political activism. Each section includes examples and studies conducted in a range of countries, exploring how

the journey to adulthood can vary according to cultural context as well as individual circumstance. The book affirms that while there is great variety in how one transitions to adulthood, there is no correct path, and most people fare well - or even thrive - in adulthood. Featuring end-of-chapter summaries, quizzes and activities, *Journeys Through Emerging Adulthood* provides an accessible yet comprehensive overview of this significant life stage, connecting fundamental psychological theories with modern social phenomena. Reifman's text is essential reading for both undergraduate and graduate students of psychology, human development and sociology, as well as students and researchers of any discipline interested in the path to adulthood.

Financialization, Financial Literacy, and Social Education Thomas A. Lucey 2021-09-30

The objective of this book is to prompt a re-examination of financial literacy, its social foundations, and its relationship to citizenship education. The collection includes topics that concern indigenous people's perspectives, critical race theory, and transdisciplinary perspectives, which invite a dialogue about the ideologies that drive traditional and critical perspectives. This volume offers readers opportunities to learn about different views of financial literacy from a variety of sociological, historical and cultural perspectives. The reader may perceive financial literacy as representing a multifaceted concept best interpreted through a non-segregated lens. The volume includes chapters that describe groundings for revising standards, provide innovative teaching concepts, and offer unique sociological and historical

perspectives. This book contains 13 chapters, with each one speaking to a distinctive topic that, taken as a whole, offers a well-rounded vision of financial literacy to benefit social education, its research, and teaching. Each chapter provides a response from an alternative view, and the reader can also access an eResource featuring the authors' rejoinders. It therefore offers contrasting visions about the nature and purpose of financial education. These dissimilar perspectives offer an opportunity for examining different social ideologies that may guide approaches to financial literacy and citizenship, along with the philosophies and principles that shape them. The principles that teach and inform about financial literacy defines the premises for base personal and community responsibility. The work invites researchers and practitioners to reconsider financial literacy/financial education and its social foundations. The book will appeal to a range of students, academics and researchers across a

Emotions Online Alan Petersen 2022-12-30

Digital media have become deeply immersed in our lives, heightening both hopes and fears of their affordances. While the internet, mobile phones, and social media offer their users many options, they also engender concerns about their manipulations and intrusions. *Emotions Online* explores the visions that shape responses to media and the emotional regimes that govern people's engagements with them. This book critically examines evidence on the role of digital media in emotional life. Offering a sociological perspective and using ideas from science and technology studies and media studies, it explores:

- The dimensions and operations of the online emotional economy
- Growing concerns about online harms and abuse, especially to children
- 'Deepfakes' and other forms of image-

based abuse

- The role of hope in shaping online behaviours
- 'Digital well-being' and its market
- COVID-19's impacts on perceptions of digital media and Big Tech
- Growing challenges to centralised control of the internet, and the implications for future emotional life

The book breaks new ground in the sociological study of digital media and the emotions. It reveals the dynamics of online emotional regimes showing how deceptive designs and algorithm-driven technologies serve to attract and engage users. As it argues, digital media rely on the emotional labours of many people, including social media influencers and content moderators who make the internet seem smart. The book provides an invaluable overview of the evidence and debates on the role of digital media in emotional life and guidance for future research, policy, and action.

The Power of And R. Edward Freeman
2020-06-16 The idea that business is only about the money doesn't hold true in the twenty-first century, when companies around the world are giving up traditional distinctions in order to succeed. Yet our expectations for businesses remain under the sway of an outdated worldview that emphasizes profits for shareholders above all else. *The Power of And* offers a new narrative about the nature of business, revealing the focus on responsibility and ethics that unites today's most influential ideas and companies. R. Edward Freeman, Kirsten E. Martin, and Bidhan L. Parmar detail an emerging business model built on five key concepts: prioritizing purpose as well

as profits; creating value for stakeholders as well as shareholders; seeing business as embedded in society as well as markets; recognizing people's full humanity as well as their economic interests; and integrating business and ethics into a more holistic model. Drawing on examples across companies, industries, and countries, they show that these values support persevering in hard times and prospering over the long term. Real-world success stories disprove the conventional wisdom that there are unavoidable trade-offs between acting ethically and succeeding financially. *The Power of And* presents a conceptual revolution about what it means for business to be responsible, providing a new story for us to tell in order to help all kinds of companies thrive.
