The Brothers Grimm Spectaculathon Don Zolidis 2007 Two narrators attempt to recreate all 209 of the fairy tales of the Brothers Grimm in a wild, fast-paced extravaganza. To make it more difficult, they attempt to combine them into one gigantic fable using Rapunzel, Rumpelstiltskin, Hansel and Gretel, Snow White, Sleeping Beauty, Cinderella and other more obscure stories like Lean Lisa and The Devil's Grandmother. *Cambridge International a Level Information Technology Student's Book* Graham Brown 2021-01-29 We are working with Cambridge Assessment International Education to gain endorsement for this title. Addressing Challenging Moments in Psychotherapy Jerome S. Gans 2021-09-30 "This practical and helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy, treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, *Challenging Moments in Psychotherapy* is essential reading for all clinicians, teachers, and supervisors of psychotherapy"--

Capital Ideas Jeffrey M. Chwieroth 2009-12-14 The right of governments to employ capital controls has always been the official orthodoxy of the International Monetary Fund, and the organization's formal rules providing this right have not changed significantly since the IMF was founded in 1945. But informally, among the staff inside the IMF, these controls became heresy in the 1980s and 1990s, prompting critics to accuse the IMF of indiscriminately encouraging the liberalization of controls and precipitating a wave of financial crises in emerging markets in the late 1990s. In *Capital Ideas*, Jeffrey Chwieroth explores the inner workings of the IMF to understand how its staff's thinking about capital controls changed so radically. In doing so, he also provides an important case study of how international organizations work and evolve. Drawing on original survey and archival research, extensive interviews, and scholarship from economics, politics, and sociology, Chwieroth traces the evolution of the IMF's approach to capital controls from the 1940s through spring 2009 and the first stages of the subprime credit crisis. He shows that IMF staff vigorously debated the legitimacy of capital controls and that these internal debates eventually changed the organization's behavior--despite the lack of major rule changes. He also shows that the IMF exercised a significant amount of autonomy despite the influence of member states. Normative and behavioral changes in international organizations, Chwieroth concludes, are driven not just by new rules but also by the evolving makeup, beliefs, debates, and strategic agency of their staffs.

Riding Man Mark Gardiner 2012-07-15 For 100 years, the Isle of Man Tourist Trophy races have been the world's most dangerous organized sporting event. As one of thirty thousand fans who attended the annual spectacle, Mark Gardiner harbored no illusions about his own skill or bravery. He was, however, an avid motorcyclist for whom the race represented a boyhood dream. He went home, quit his job, sold everything he owned, and returned to the Island to race there himself. Riding Man is the account of an Everyman, struggling to qualify for -- and survive -- the TT races. If you're a dreamer, the lesson in this book is that the pursuit of any worthwhile goal involves risks, rewards and, almost inevitably some regrets. If you're not a dreamer, the lesson is more important: the deepest regrets are always over risks not taken.

Far from a dry, nuts-and-bolts exposition, however, 101 THINGS I LEARNED IN ENGINEERING SCHOOL probes real-world examples to show how the engineer's way of thinking can-and sometimes cannot-inform our understanding of how things work. Questions from the simple to the profound are illuminated throughout: Why shouldn't soldiers march across a bridge? Why do buildings want to float and cars want to fly? What is the difference between thinking systemically and thinking systematically? How can engineering solutions sympathize with the natural environment? Presented in the familiar, illustrated format of the popular 101 THINGS I LEARNED series, 101 THINGS I LEARNED IN ENGINEERING SCHOOL offers an informative resource for students, general readers, and even experienced engineers, who will discover within many provocative new insights into familiar principles.
