America's Lab Report National Research Council 2006-01-20 Laboratory experiences as a part of most U.S. high school science curricula have been taken for granted for decades, but they have rarely been carefully examined. What do they contribute to science learning? What can they contribute to science learning? What is the current status of labs in our nation's high schools as a context for learning science? This book looks at a range of questions about how laboratory experiences fit into U.S. high schools: What is effective laboratory teaching? What does research tell us about learning in high school science labs? How should student learning in laboratory experiences be assessed? Do all students have access to laboratory experiences? What changes need to be made to improve laboratory experiences for high school students? How can school organization contribute to effective laboratory teaching? With increased attention to the U.S. education system and student outcomes, no part of the high school curriculum should escape scrutiny. This timely book investigates factors that influence a high school laboratory experience, looking closely at what currently takes place and what the goals of those experiences are and should be. Science educators, school administrators, policy makers, and parents will all benefit from a better understanding of the need for laboratory experiences to be an integral part of the science curriculum-and how that can be accomplished.

Feminine Gospels Carol Ann Duffy 2012-12-13 In *Feminine Gospels*, Carol Ann Duffy draws on the historical, the archetypal, the biblical and the fantastical to create various visions - and revisions - of female identity. Simultaneously stripping women bare and revealing them in all their guises and disguises, these poems tell tall stories as though they were true confessions, and spin modern myths from real women seen in every aspect - as bodies and corpses, writers and workers, shoppers and slimmers, fairytale royals or girls-next-door. 'Part of Duffy's talent - besides her ear for ordinary eloquence, her gorgeous, powerful, throwaway lines, her subtlety - is her ventriloquism . . . From verbal nuances to mind-expanding imaginative leaps, her words seem freshly plucked from the minds of non-poets - that is, she makes it look easy' Charlotte Mendelson, *Observer*

The Battle Over Homework Harris M. Cooper 2015-02-03 Homework is the cause of more friction between schools and home than any other aspect of education and becomes the prime battlefield when schools, families, and communities view one another as adversaries. This comprehensive fourth edition tackles all the tough questions: What's the right amount of homework? What role should parents play in the homework process? What is the connection between homework and achievement? This essential reference offers all stakeholders—administrators, teachers, and parents—the opportunity to end the battle and turn homework into a cooperative endeavor to promote student learning.

The Modern Turn Michael Rohlf 2017-12 What is the modern turn in philosophy? In other words, what are the features that make modern philosophy distinctively "modern" in contrast with the pre-modern philosophy from which it emerged? The twelve essays in this volume seek to address this question, and in doing so, exemplify and contribute to a rich debate about the nature and value of modern philosophy.

A Taxonomy for Learning, Teaching, and Assessing Lorin W. Anderson 2001 This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge

and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.
