Financial Accountability in Nepal World Bank 2003 "Nepal has suffered from the lack of proper management of public expenditures, stagnant real revenues, large and inefficient parastatals, and a weak financial sector. Fiduciary risk remains high. His Majesty's Government of Nepal has accorded high priority to the assurance of good accountability and transparency in public sector financial management." "Reforms are now critical and should be approached in an integrated way covering planning, budgeting, accounting, internal control, internal audit, external audit, and oversight. Action in only one area of financial management will not result in the same degree of benefits. The capacity building recommended in this report's Development Action Plan is designed to introduce international accounting and auditing standards in both the public and the private sectors, and to close the gap between precept and practice. The Government has a firm commitment to implement these time-bound actions." --Résumé de l'éditeur.

The Financial Numbers Game Charles W. Mulford 2011-03-10 Praise for *The Financial Numbers Game* "So much for the notion 'those who can, do-those who can't, teach.' Mulford and Comiskey function successfully both as college professors and real-world financial mercenaries. These guys know their balance sheets. *The Financial Numbers Game* should serve as a survival manual for both serious individual investors and industry pros who study and act upon the interpretation of financial statements. This unique blend of battle-earned scholarship and quality writing is a must-read/must-have reference for serious financial statement analysis." --Bob Acker, Editor/Publisher, *The Acker Letter*

"Wall Street's unforgiving attention to quarterly earnings presents ever increasing pressure on CFOs to manage earnings and expectations. *The Financial Numbers Game* provides a clear explanation of the ways in which management can stretch, bend, and break accounting rules to reach the desired bottom line. This arms the serious investor or financial analyst with the healthy skepticism required to drive beyond reported results to a clear understanding of a firm's true performance." --Mark Hurley, Managing Director, Training and Development, Global Corporate and Investment Banking, Bank of America "After reading *The Financial Numbers Game*, I feel as though I've taken a master's level course in financial statement analysis. Mulford and Comiskey's latest book should be required reading for anyone who is serious about fundamentally analyzing stocks." --Harry Domash, San Francisco Chronicle investing columnist and investment newsletter publisher

Off-Balance Sheet Activities Joshua Ronen 1990-11-30 The objective of *Off-Balance Sheet Activities* is to gain insights into, and propose meaningful solutions to, those issues raised by the current proliferation of off-balance sheet transactions. The book has its origins in a New York University conference that focused on this topic. Jointly undertaken by the Vincent C. Ross Institute of Accounting Research and New York University's Salomon Center for the study of Financial Institutions at the Stern School of Business, the conference brought together academic researchers and practitioners in the field of accounting and finance to address the issues with the broad-mindedness requisite of a group whose approaches to solutions are as different from each other as their respective theoretical and applied approaches to the disciplines of finance and accounting. The essays are divided into two sections. The first covers issues surrounding OBS activities and banking and begins with a brief introduction that places the essays into context. OBS activities and the underinvestment problem, whether loan sales are really OBS, and money demand and OBS liquidity are examined in detail. Section two, which also begins with a brief introduction, focuses on issues of securitized assets and financing. A report on recognition and measurement issues in accounting for securitized assets is followed by three separate discussion essays. Other subjects covered include contract theoretic analysis of OBS financing, the use of OBS financing to circumvent financial covenant restrictions, and debt contracting and financial contracting. The latter two contributions are also followed by discussion essays. This unique collection of papers will prove to be an interesting and valuable tool for accounting and finance professionals as well as for academics involved in these fields. It will also be an important addition to public, college, and university libraries.

Tripartite Accounting Femi Oladele 2015-12-16 Is accounting as a first course going extinct? What motivates students' choice of accounting as a career? How true is it that if you are not chartered, you are not an accountant? These are few of the questions that this book responds to. It is an orientation tool for intending students, students, lecturers/tutors, researchers, practitioners, policy makers, parents and the general public on the neglected story of accounting profession. It is written with the sole aim of enlightening its reader on who accountants are; career paths of accountants and their role in society; providing information to assist students in deciding a choice of career in the field of accounting. It places emphasis on the role-relevance of tertiary institutions in the development of accountants with robust acumen. This book opens up on the unsung story of the accounting profession, bringing to the fore the fact that the profession has emerged with three wings, that is practice, policy and research. As we continue to face an increasingly competitive market, the need to produce graduates with requisite knowledge and skill competence to fill vacancies in industries, which are faced with apparent economic circumstances are overwhelming. However, while it may be acceptable to find a meantime solution, a long term sustainable solution is better, which is to focus on breeding efficient, effective and productive accountants, who can sustain the objectives and goals of the going concern. Tertiary institutions must not underestimate the need to concentrate energy on creating awareness, arming graduates with necessary knowledge and skills on elements of accounting profession, which is a better way out to solve the problem rather than the fire brigade approach to salvage the situation. As the industry look up to institutions to step up the game, we must wow them by producing graduate accountants who will not only be able to practice, but also can in their circumference engage with policy issues and research in the work place environment for increased and sustainable productivity.
