Warm Beer, Lousy Food John S. Columbia 2009-12 The line began forming after eight o'clock. Sal, short and heavy-set, kept everyone busy. Neat, in a white shirt and sports jacket, with his grey fedora cocked to the side, his crooked grin made you smile. Without warning the heavy door would swing open and the waiters would come outside to join him. They were dressed in pajamas or prison garb, with hats and horns, and were there to warm up the crowd. Some in line expected this, others were shocked. The pink polka dot building should have been a warning. Complete strangers in line became chummy, exchanging stories they had heard; toilet seat covers to serve drinks on, microphones in the ladies room, toilet paper for napkins. Most had brought their friends there to be roasted. The line of people varied in age. They all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye. The club's routines were blue in color, but harmless. If you were lucky you might see a "Balls for the Queen" or a "Singing beer." The price was always right for a good time and Warm Beer and Lousy Food was the place to be.

Executive Function(s): Conductor, Orchestra or Symphony? Towards a Trans-Disciplinary Unification of Theory and Practice Across Development, in Normal and Atypical Groups Lynne A. Barker

2018-08-30 There are several theories of executive function(s) that tend to share some theoretical overlap yet are also conceptually distinct, each bolstered by empirical data (Norman and Shallice, 1986; Shallice & Burgess, 1991; Stuss and Alexander, 2007; Burgess, Gilbert, & Dumentheil, 2007; Burgess & Shallice, 1996; Miyake et al., 2000). The notion that executive processes are supervisory, and most in demand in novel situations was an early conceptualization of executive function that has been adapted and refined over time (Norman & Shallice, 1986; Shallice, 2001; Burgess, Gilbert & Dumentheil, 2007). Presently there is general consensus that executive functions are multi-componential (Shallice, 2001), and are supervisory only in the sense that attention in one form or another is key to the co-ordination of other hierarchically organized 'lower' cognitive processes. Attention in this sense is defined as (i) independent but interrelated attentional control processes (Stuss & Alexander, 2007); (ii) automatic orientation towards stimuli in the environment or internally-driven thought (Burgess, Gilbert & Dumontheil, 2007); (iii) the automatically generated interface between tacit processes and strategic conscious thought (Barker, Andrade, Romanowski, Morton and Wasti, 2006; Morton and Barker, 2010); and (iv) distinct but interrelated executive processes that maintain, update and switch across different sources of information (Miyake et al., 2000). One problem is that executive dysfunction or dysexecutive syndrome (Baddeley & Wilson, 1988) after brain injury typically produces a constellation of deficits across social, cognate, emotional and

motivational domains that rarely map neatly onto theoretical frameworks (Barker, Andrade & Romanowski, 2004). As a consequence there is debate that conceptual theories of executive function do not always correspond well to the clinical picture (Manchester, Priestley & Jackson, 2004). Several studies have reported cases of individuals with frontal lobe pathology and impaired daily functioning despite having little detectable impairment on traditional tests of executive function (Shallice & Burgess, 1991; Eslinger & Damasio, 1985; Barker, Andrade & Romanowski, 2004; Andrés & Van der Linden, 2002; Chevignard et al., 2000; Cripe, 1998; Fortin, Godbout & Braun, 2003). There is also some suggestion that weak ecological validity limits predictive and clinical utility of many traditional measures of executive function (Burgess et al, 2006; Lamberts, Evans & Spikman, 2010; Barker, Morton, Morrison, McGuire, 2011). Complete elimination of environmental confounds runs the risk of generating results that cannot be generalized beyond constrained circumstances of the test environment (Barker, Andrade & Romanowski, 2004). Several researchers have concluded that a new approach is needed that is mindful of the needs of the clinician yet also informed by the academic debate and progress within the discipline (McFarquhar & Barker, 2012; Burgess et al., 2006). Finally, translational issues also confound executive function research across different disciplines (psychiatry, cognitive science, and developmental psychology) and across typically developing and clinical populations (including Autism Spectrum Disorders, Head Injury and Schizophrenia - Blakemore & Choudhury, 2006; Taylor, Barker, Heavey & McHale, 2013). Consequently, there is a need for unification of executive function approaches across disciplines and populations and narrowing of the conceptual gap between theoretical positions, clinical symptoms and measurement.

The End of Normal James K. Galbraith
2014-09-09 From one of the most respected economic thinkers and writers of our time, a brilliant argument about the history and future of economic growth. The years since the Great Crisis of 2008 have seen slow growth, high unemployment, falling home values, chronic

deficits, a deepening disaster in Europe—and a stale argument between two false solutions, “austerity” on one side and “stimulus” on the other. Both sides and practically all analyses of the crisis so far take for granted that the economic growth from the early 1950s until 2000—interrupted only by the troubled 1970s—represented a normal performance. From this perspective, the crisis was an interruption, caused by bad policy or bad people, and full recovery is to be expected if the cause is corrected. The End of Normal challenges this view. Placing the crisis in perspective, Galbraith argues that the 1970s already ended the age of easy growth. The 1980s and 1990s saw only uneven growth, with rising inequality within and between countries. And the 2000s saw the end even of that—despite frantic efforts to keep growth going with tax cuts, war spending, and financial deregulation. When the crisis finally came, stimulus and automatic stabilization were able to place a floor under economic collapse. But they are not able to bring about a return to high growth and full employment. In *The End of Normal*, “Galbraith puts his pessimism into an engaging, plausible frame. His contentions deserve the attention of all economists and serious financial minds across the political spectrum” (Publishers Weekly, starred review).

People and Computers XX - Engage Nick Bryan-Kinns 2007-08-10 Reading has arguably the longest and richest history of any domain for scientifically considering the impact of technology on the user. From the 1920s to the 1950s, Miles Tinker [1963] and other researchers ran hundreds of user tests that examined the effects of different fonts and text layout variables, such as the amount of vertical space between each line of text (called leading). Their research focused on user performance, and reading speed was the favoured measure. They charted the effect of the manipulated variables on reading speed, looking for the point at which their participants could read the fastest. Their assumption was that faster reading speeds created a more optimal experience. Printers and publishers eagerly consumed this research. In recent years, some of these variables have been reexamined as the technology and capabilities evolve with the advent of computers and computer screens.

Dillon [1992] examined how to design textual information for an electronic environment. Boyarski et al. [1998] examined the effect of fonts that were designed for computer screens. Dyson & Kipping [1998] examined the effect of line length on computer screens. Larson et al. [2000] examined the effect of 3-D rotation on reading. Gugerty et al. [2004] demonstrated a reading performance advantage with the Microsoft ClearType display technology.

The Physics of Star Trek Lawrence M. Krauss 2007-08-02 How does the Star Trek universe stack up against the real universe? What warps when you're traveling at warp speed? What is the difference between a wormhole and a black hole? Are time loops really possible, and can I kill my grandmother before I am born? Anyone who has ever wondered "could this really happen?" will gain useful insights into the Star Trek universe (and, incidentally, the real world of physics) in this charming and accessible guide. Lawrence M. Krauss boldly goes where Star Trek has gone-and beyond. From Newton to Hawking, from Einstein to Feynman, from Kirk to Picard, Krauss leads readers on a voyage to the world of physics as we now know it and as it might one day be.

Blessed Beyond Stress Patricia Lawson 2016-09-20 I know you've heard it a thousand times, "I'm too blessed to be stressed." Although a popular cliché, please know that it is possible to be stressed far beyond stress. Too many of God's precious people have become victimized by unwanted pressure that accompanies the circumstances in their everyday lives. The dreadful aftermath of stress has claimed the lives of some even to the point of death. That is

why, I wrote this book to encourage you in the faith. You may not be able to pray away your circumstances; but you can certainly confess your way through them! This book will help you to do just that. You can be blessed beyond the mess and the stress that's trying to consume you.

Our Only World Wendell Berry 2015-02-01

"Stern but compassionate, author Wendell Berry raises broader issues that environmentalists rarely focus on . . . In one sense Berry is the voice of a rural agrarian tradition that stretches from rural Kentucky back to the origins of human civilization. But his insights are universal because *Our Only World* is filled with beautiful, compassionate writing and careful, profound thinking."—Associated Press The planet's environmental problems respect no national boundaries. From soil erosion and population displacement to climate change and failed energy policies, American governing classes are paid by corporations to pretend that debate is the only democratic necessity and that solutions are capable of withstanding endless delay. Late Capitalism goes about its business of finishing off the planet. And we citizens are left with a shell of what was once proudly described as The American Dream. In this collection of eleven essays, Berry confronts head-on the necessity of clear thinking and direct action. Never one to ignore the present challenge, he understands

that only clearly stated questions support the understanding their answers require. For more than fifty years we've had no better spokesman and no more eloquent advocate for the planet, for our families, and for the future of our children and ourselves.

Armored Cav Tom Clancy 1994-11-01 A penetrating look inside an armored cavalry regiment -- the technology, the strategies, and the people . . . profiled by Tom Clancy. His first non-fiction book, *Submarine*, captured the reality of life aboard a nuclear warship. Now, the #1 bestselling author of *Clear and Present Danger* and *Without Remorse* portrays today's military as only army personnel can know it. With the same compelling, you-are-there immediacy of his acclaimed fiction, Tom Clancy provides detailed descriptions of tanks, helicopters, artillery, and more -- the brilliant technology behind the U. S. Army. He captures military life -- from the drama of combat to the daily routine -- with total accuracy, and reveals the roles and missions that have in recent years distinguished our fighting forces. *Armored Cav* includes: Descriptions of the M1A2 Main Battle Tank, the AH-64A Apache Attack Helicopter, and more An interview with General Frederick Franks Strategies behind the Desert Storm account Exclusive photograph, illustrations and diagrams PLUS: From West Point cadet to Desert Storm commander . . . an interview with a combat cavalry officer on the rise.

The Death of Aztec Tenochtitlan, the Life of Mexico City Barbara E. Mundy 2015-07-15 "In 1325, the Aztecs founded their capital city Tenochtitlan, which grew to be one of the world's largest cities before it was violently destroyed in 1521 by conquistadors from Spain and their indigenous allies. Re-christened and

reoccupied by the Spanish conquerors as Mexico City, it became the pivot of global trade linking Europe and Asia in the 17th century, and one of the modern world's most populous metropolitan areas. However, the Aztec city of Tenochtitlan and its people did not entirely disappear when the Spanish conquistadors destroyed it. By reorienting Mexico City-Tenochtitlan as a colonial capital and indigenous city, Mundy demonstrates its continuity across time. Using maps, manuscripts, and artworks, she draws out two themes: the struggle for power by indigenous city rulers and the management and manipulation of local ecology, especially water, that was necessary to maintain the city's sacred character. What emerges is the story of a city-within-a city that continues to this day"--

explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both

graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.
