Recent Trends in Social and Behaviour Sciences Ford Lumban Gaol

2014-02-27 The human aspect plays an important role in the social sciences. The behaviour of people has become a vital area of focus in the social sciences as well. *Recent Trends in Social and Behaviour Sciences* contains papers that were originally presented at the International Congress on Interdisciplinary Behavior and Social Sciences, held 4-5 November 2011

Sensual Religion Graham Harvey 2018 *Sensual Religion* demonstrates the value of paying attention to the senses and materials in lived religion and also leads the way for improved studies of religion as sensuality. Each of the five senses - vision, hearing, taste, touch and smell - will be covered by two chapters, the first historical and the second contemporary. The historical discussions focus on the sensuality of religion in ancient Greece, Samaria, Rome and Byzantium -- including reflections on their value for understanding other historical and contemporary contexts. Chapters with a contemporary focus engage with Chinese, African-Brazilian, Sikh, First Nations and Métis, and Spanish Catholic religious lives and activities. Beyond the rich case studies, each chapter offers perspectives and arguments about better ways of approaching lived, material and performative religion -- or sensual religion. Historical and ethnographic critical and methodological expertise is presented in ways that will inspire and enable readers to apply, refine and improve on their practice of the study of religions. In particular, our intention is to foreground the senses and sensuality as a critical issue in understanding religion and to radically improve multi- and inter-disciplinary research and teaching about the lived realities of religious people in this sensual world.

The Scientification of Religion Kocku von Stuckrad 2014-05-08 The enigmatic relation between religion and science still presents a challenge to European societies and to ideas about what it means to be 'modern.' This book argues that European secularism, rather than pushing back religious truth claims, in fact has been religiously productive itself. The institutional establishment of new disciplines in the nineteenth century, such as religious studies, anthropology, psychology, classical studies, and the study of various religious traditions, led to a professionalization of knowledge about religion that in turn attributed new meanings to religion. This attribution of meaning resulted in the emergence of new religious identities and practices. In a dynamic that is closely linked to

this discursive change, the natural sciences adopted religious and metaphysical claims and integrated them in their framework of meaning, resulting in a special form of scientific religiosity that has gained much influence in the twentieth century. Applying methods that come from historical discourse analysis, the book demonstrates that religious semantics have been reconfigured in the secular sciences. Ultimately, the scientification of religion perpetuated religious truth claims under conditions of secularism.

Corporate governance and regulation : can there be too much of a good thing? Stijn Claessens 2007 Abstract: For a large number of companies from different countries, the authors analyze how company corporate governance practices and country regulatory regimes interact in terms of company valuation. They confirm that corporate governance plays a crucial role in efficient company monitoring and shareholder protection, and consequently positively impacts valuation. They find substitution in valuation impact between corporate governance measures at the company and country level, with a possibility of over-regulation. Corporate governance appears more valuable for companies that rely heavily on external financing, consistent with the hypothesis that the main role of corporate governance is to protect external financiers. *After World Religions* Christopher R Cotter 2016-02-05 The World Religions Paradigm has been the subject of critique and controversy in Religious Studies for many years. *After World Religions* provides a rationale for overhauling the World Religions curriculum, as well as a roadmap for doing so. The volume offers concise and practical introductions to cutting-edge Religious Studies method and theory, introducing a wide range of pedagogical situations and innovative solutions. An international team of scholars addresses the challenges presented in their different departmental, institutional, and geographical contexts. Instructors developing syllabi will find supplementary reading lists and specific suggestions to help guide their teaching. Students at all levels will find the book an invaluable entry point into an area of ongoing scholarly debate.

Indigenizing Movements in Europe Graham Harvey 2020-02-23 Since the mid-twentieth century, religious movements identifying themselves as Paganism, shamanism, native faiths and others have experimented with two forms of indigeneity. One arises from claims to be reviving or re-presenting previously hidden religious practices from ancestral or pre-Christian times. The other form of indigeneity is found in lessons learnt (directly or indirectly) from Indigenous peoples (especially Native Americans and/or Siberians). In the last decade in particular these two trends have sometimes fused in what we call "indigenizing movements". This book tests the interpretive and methodological value of this.

"Indigenizing" was coined by Paul C. Johnson in a discussion of lowland South American and Caribbean religious traditions as the opposite end of a continuum from "universalizing". The continuum recognises tendencies to emphasise resonance with and relevance to local and ancestral traditions (indigenizing) and tendencies to stress universality or global engagement. These need not be dualistically opposed and are most likely to be matters of stress. Those who conceive of themselves and their cultures as maintaining and enhancing discrete ethnic, cultural or religious communities may represent one trajectory. Others not only assert that they have something to say to the rest of the world but may also seek to revise "local ancestral" traditions in the light of more global traditions. We might recognise a tension here between "Indigenous" and "World" religions but the contributors to this volume contest the value of that categorisation of what are, in reality, more dynamic and fluid realities. The chapters test a differently conceived tension: that between indigenizing and universalizing. This experimentation is propelled by examining European originated movements in which engagements with Indigenous animistic, shamanistic or "nature venerating" traditions are employed in self-conceptions and in the discourses of identity formation, maintenance and dissemination. Seven main chapters test aspects of our key theme by focusing on specific movements or phenomena. These are followed by a responsive afterword considering the effects of applying a notion coined for the critical examination of Indigenous South American and Caribbean religions to the different context of European movements. The book aims to enhance understanding and enrich debate not only about evolving European movements but also about the concept and practice of Indigeneity, indigenizing and of scholarly practices in relation to such phenomena.

Optimum Size of Government Intervention Ramesh Chandra Das 2021-08-17 This book critically examines the optimum range and duration of government interventions in the economic activities of a modern state based on theoretical and empirical frameworks, and assesses their role and extent in various economies. With a special focus on emerging economies across the globe, it discusses themes such as income growth; social sector development; good governance and economic progress; threshold limits; optimum budget policy and economic growth; sustainable distributional managements in public projects; food for work programs; agricultural infrastructure development; technological progress and economic growth; and distributional equities. The policy suggestions provided here offer helpful blueprints for developmental projects. Rich in data and figures, the book addresses sector-specific case studies like healthcare; irrigation and agriculture; infrastructure; taxation and economic growth; and public sector enterprises. It will be an excellent read for scholars and researchers of economics, Indian economics, macroeconomics, political economy, public policy, political science and management, development studies, development economy and governance. It will also be useful to policymakers, administrative officials, and government and corporate bodies.

Witchcraft continued Willem De Blecourt 2018-07-30 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. The study of witchcraft accusations in Europe during the period after the end of the witch trials is still in its infancy. Witches were scratched in England, swum in Germany, beaten in the Netherlands and shot in France. The continued widespread belief in witchcraft and magic in nineteenth- and twentieth-century France has received considerable academic attention. The book discusses the extent and nature of witchcraft accusations in the period and provides a general

survey of the published work on the subject for an English audience. It explores the presence of magical elements in everyday life during the modern period in Spain. The book provides a general overview of vernacular magical beliefs and practices in Italy from the time of unification to the present, with particular attention to how these traditions have been studied. By functioning as mechanisms of social ethos and control, narratives of magical harm were assured a place at the very heart of rural Finnish social dynamics into the twentieth century. The book draws upon over 300 narratives recorded in rural Finland in the late nineteenth and early twentieth centuries that provide information concerning the social relations, tensions and strategies that framed sorcery and the counter-magic employed against it. It is concerned with a special form of witchcraft that is practised only amongst Hungarians living in Transylvania.

Key Terms in Material Religion S. Brent Plate 2015-12-17 Material religion is a rapidly growing field, and this volume offers an accessible, critical entry into these new areas of research. Each "key term" uses case studies and is accompanied by a color image – an object, practice, space, or site. The entries cut across geographies, histories, and traditions, offering a versatile and engaging text for the classroom. Key topics covered include: - Icon, ritual, magic, gender, race - Sacred, spirit, technology, - Space, belief, body, brain - Taste, touch, smell, sound, vision Each entry demonstrates in clear and jargon-free prose how the key term figures prominently in understanding the materiality of religion. Written by leading international scholars, all entries are linked by the ways materiality stands at the forefront of the understanding of religion, whether that comes from humanistic, social scientific, artistic, curatorial, or other perspectives. Brent Plate brings his expertise and extensive teaching experience to the comprehensive introduction which introduces students to the themes and methods of the material cultural study of religion. Key Terms in Material Religion provides a much-needed resource for courses on theory and method in religious studies, the anthropology of religion, and the ever-increasing number of courses focused on material religion.

Communication Technologies, Information Security and Sustainable Development Faisal Karim Shaikh 2014-09-25 This book constitutes the thoroughly refereed proceedings of the Third International Multi-topic Conference on Communications, Technologies, Information Security and Sustainable Development, IMTIC 2013, held in Jamshoro, Pakistan, in December 2013. The 27 revised papers presented in this volume were carefully reviewed and selected from 140 submissions. The topics presented had a reasonable balance between theory and practice in multi-disciplined topics including wireless sensor networks, cloud computing, wireless communication, antenna design, signal processing, software engineering, image processing, bioinformatics and telemedicine, neural networks, automation and control, and green renewable energy.

Creative Learning in Higher Education Linda S. Watts 2016-07-22 This book provides higher education faculty and administrators a scholarly resource on the most salient aspects and emerging trends in creative learning in higher education today. International contributors explore ways to foster creativity in any student, regardless of academic discipline or demographic characteristics and demonstrate that creativity is a skill all students can and should learn. Chapters analyzes how different countries and cultures implement creative learning, exploring issues of instruction, assessment, and ultimately how these practices are transforming learning. This important book helps higher education professionals understand and cultivate creative learning across disciplines in any college and university setting.

Fictional Practice: Magic, Narration, and the Power of Imagination 2021-09-27 Tying on case studies from late antiquity to the 21st century, this is the first volume that systematically explores the inter-relationship between fictional narratives about magic and the real-world ritual art of practicing magicians.

Dissertation Research and Writing for Construction Students Shamil Naoum 2012-05-23 Aimed specifically at students on BSc and taught Masters programmes who are embarking on research for the first time, this book is clear with explanatory text supported by numerous examples illustrating good practice.

Individual Learners W. Ray Crozier 2013-04-03 No two learners are the same. They take different approaches to learning tasks and they respond to formal education in different ways. Yet the current emphasis in education is on what is common to learners, from a common curriculum to a common teaching method. Individual Learners reviews and discusses recent research that shows that differences in personality

contribute significantly to children's and adults' experiences of success and failure in education. Individual Learners considers fundamental issues in the study of personality, and provides an up-to-date review and evaluation of the continuing nature-nurture debate. It then examines five traits that can have an impact upon learning: aggressiveness, anxiety, achievement, motivation, self-confidence and shyness. The book provides an accessible account of the recent research into the links between personality and education and its implications for educational practice. It will be invaluable to anyone with an interest in education, whether students, teachers or lecturers.

The Art and Politics of Wana Shamanship Jane Monnig Atkinson 2023-09-01 Rituals are valued by students of culture as lenses for bringing facets of social life and meaning into focus. Jane Monnig Atkinson's carefully crafted study offers unique insight into the rich shamanic ritual tradition of the Wana, an upland population of Sulawesi, Indonesia.

It is increasingly accepted that intervention in childbirth has long-term consequences for women and their children. Birth Territory provides practical, evidence-based ideas for restructuring the birth territory to facilitate normal birth. Links new research findings to birth environments and outcomes. Describes the elements of an ideal birthing environment. Suggests how to modify existing maternity services to achieve optimal results. Investigates the links between the experiences of women and babies, and outcomes. Explores the effects of legal and socio-political factors.

Riding a Tiger Vinay Capila 2018-03-13 ... As they looked at each other in consternation, a man appeared in the doorway wearing a black uniform and balaclava face mask ... "I am told that you feel very cold at night. We have come to fix some heating for you ...," he added with a taunting chuckle, signaling his men to enter ... The room soon reeked of petrol fumes as his men backed out, leaving a thin trail of the fuel ... They watched in fascinated horror as a cold blue flame crept through the doorway like a slithering snake and split into two to encircle them. There was a whosh of sound and the blue turned to an orange as the flames engulfed the curtains and furniture. The inferno crept rapidly towards the terrified trio - their cries muted by the duct tape over their mouths. Soon there were only orange-red flames and crackling sound and the smell of charred wood and cloth and flesh. Two boys, leading normal lives in two separate towns, are lured by circumstances to join an extreme rightist organization. They come together to help the organization increase the membership of its political arm. Over the coming years they are driven to actualize their individual ambitions and take their Party and the country by storm, with the help of rampant false promises and rabid roving gangs. They do not realize that it is always dangerous to ride a tiger - for it has its own ravenous appetite and desires.

Levi-Strauss on Religion Paul-Francois Tremlett 2014-12-05 Levi-Strauss, the 'father of modern anthropology', is one of the most influential thinkers of the Twentieth Century. His development of 'structuralism' - the identification of patterns of human cognition and behaviour - greatly influenced Althusser, Lacan, Foucault and Derrida. - Levi-Strauss on Religion- presents one of the only examinations of the importance of Levi-Strauss' thought and work to the study of religion. The book examines his methodology as well as his contributions to the study of kinship, totemism, and myth. The issues raised by Levi-Strauss' anthropological, political and philosophical texts are placed alongside contemporary debates in religious studies and the student is introduced to the thinkers and theories that informed his writings. This book will be invaluable to students of the anthropology and phenomenology of religion.

Food, Sex and Strangers Graham Harvey 2014-09-11 Religion is more than a matter of worshipping a deity or spirit. For many people, religion pervades every part of their lives and is not separated off into some purely private and personal realm. Religion is integral to many people's relationship with the wider world, an aspect of their dwelling among other beings - both human and other-than-human - and something manifested in the everyday world of eating food, having sex and fearing strangers. "Food, Sex and Strangers" offers alternative ways of thinking about what religion involves and how we might better understand it. Drawing on studies of contemporary religions, especially among indigenous peoples, the book argues that religion serves to maintain and enhance human relationships in and with the larger-than-human world. Fundamentally, religion can be better understood through the ways we negotiate our lives than in affirmations of belief - and it is best seen when people engage in intimate acts with themselves and others.

Creativity and Critique in Online Learning Jacqueline Baxter 2018-06-12 This book explores emerging practices in distance education that have been facilitated by the development of educational technology. The volume examines core themes in distance education including online education at scale, embodiment in online environments, connectivity in online education and the personalisation of learning experiences within online education. The first section of the book examines online teaching tools, and explores how they are being used to enhance and promote student learning. The second looks at some of the broader challenges encountered by online teachers and those responsible for designing online learning material. While this volume will be of significant interest to distance learning universities and colleges, it will also be a valuable resource to traditional Higher Education Institutions, who are increasingly searching for innovative ways to reach and teach their students. This edited collection will be of value to scholars of online education as well as practitioners and policy makers looking to enrich their notions of online pedagogy.

Shamans/neo-Shamans Robert J. Wallis 2003 Robert J. Wallis explores the interface between the 'new' and prehistoric shamans of popular culture and anthropology, drawing on interviews with a variety of practitioners, particularly contemporary pagans in Britain and north America.

Max Weber Hans Henrik Bruun 2012-05-04 Weber's methodological writings form the bedrock of key ideas across the social sciences. His discussion of value freedom and value commitment, causality, understanding and explanation, theory building and ideal types have been of fundamental importance, and their impact remains undiminished today. These ideas influence the current research practice of sociologists, historians, economists and political scientists and are central to debates in the philosophy of social science. But, until now, Weber's extensive writings on methodology have lacked a comprehensive publication. Edited by two of the world's leading Weber scholars, Collected Methodological Writings will provide a completely new, accurate and reliable translation of Weber's extensive output, including previously untranslated letters. Accompanying editorial commentary explains the context of, and interconnections between, all these writings, and additional useful features include a glossary of German terms and an English key, endnotes, bibliography, and person and subject indexes.

Transdisciplinary Theory, Practice and Education Dena Fam 2018-08-27 This exciting new state-of-the art book reviews, explores and advocates ways in which collaborative research endeavours can, through a transdisciplinary lens, enhance student, academic and social experiences. Drawing from a wide range of knowledges, contexts, geographical locations and internationally renowned expertise, the book provides a unique look into the world of transdisciplinary thinking, collaborative learning and action. In doing so, the book is action orientated, reflective, theoretical and intriguing and provides a place for all of these to meet and mingle in the spirit of curiosity and imagination. **Individualized Religion** Claire Wanless 2021-04-08 Drawing on ethnographic research, this book explores individualized religion in and around Hebden Bridge in West Yorkshire. Claire Wanless demonstrates that counter to the claims of secularization theorists, the combination of informal structures and practices can provide a viable basis for socially significant religious activity that can sustain itself. The subjects of this research claim a variety of religious identities and practices, and are suspicious of religious institutions, hierarchies, rules and dogmas. Yet they participate actively in an overlapping and cross-linking informal

network of practice communities and other associations. Their engagements propagate and sustain a core ideology that prioritizes subjectivity, locates authority at the level of the individual, and also predicates itself on ideals of sharing, mutuality and community. Providing a new theory of religious association, this book is a nuanced counterpoint to the secularization thesis in the UK and points the way to new research on individual religion.

Transforming Post-Catholic Ireland Gladys Ganiel 2016 Transforming Post-Catholic Ireland is the first major book to explore the dynamic religious landscape of contemporary Ireland, north and south, and to analyze the island's religious transition. It confirms that the Catholic Church's long-standing "monopoly" has well and truly disintegrated, replaced by a mixed, post-Catholic religious "market" featuring new and growing expressions of Protestantism, as well as other religions. It describes how people of faith are developing "extra-institutional" expressions of religion, keeping their faith alive outside or in addition to the institutional Catholic Church. Drawing on island-wide surveys of clergy and laypeople, as well as more than 100 interviews, Gladys Ganiel describes how people of faith are engaging with key issues such as increased diversity, reconciliation to overcome the island's sectarian past, and ecumenism. Ganiel argues that extra-institutional religion is especially well-suited to address these and other issues due to its freedom and flexibility when compared to traditional religious institutions. She explains how those who practice extra-institutional religion have experienced personal transformation, and analyses the extent that they have contributed to wider religious, social, and political change. On an island where religion has caused much pain, from clerical sexual abuse scandals, to sectarian violence, to a frosty reception for some immigrants, those who practice their faith outside traditional religious institutions may hold the key to transforming post-Catholic Ireland into a more reconciled society.

The Appropriation of Native American Spirituality Suzanne Owen 2011-10-20 Native Americans and Canadians are largely romanticised or sidelined figures in modern society. Their spirituality has been appropriated on a relatively large scale by Europeans and non-Native Americans, with little concern for the diversity of Native American opinions. Suzanne Owen offers an insight into appropriation that will bring a new understanding and perspective to these debates. This important volume collects together these key debates from the last 25 years and sets them in context, analyses Native American objections to appropriations of their spirituality and examines 'New Age' practices based on Native American spirituality. The Appropriation of Native American Spirituality includes the findings of fieldwork among the Mi'kmaq of Newfoundland on the sharing of ceremonies between Native Americans and First Nations, which highlights an aspect of the debate that has been under-researched in both anthropology and religious studies: that Native American discourses about the breaking of 'protocols', rules on the participation and performance of ceremonies, is at the heart of objections to the appropriation of Native American spirituality.

Public Health Genomics and International Wealth Creation Ebomoyi, E. William 2016-03-30 In 2003, the secrets of the human genome were cracked open, creating a flurry of anticipation (and more than a little commercial buzz) about the role that genetic modification would play in years to come. This burgeoning field stands poised to redefine old paradigms and reshape industries such as medicine, agriculture, pharmacology, and biotechnology. Public Health Genomics and International Wealth Creation seeks to explore new opportunities and challenges in genomic commercialization by presenting a roadmap of current research, setting forth clear guidelines for how genomics can be wielded safely and ethically in a manner concordant with public welfare. Addressing problems such as chronic disease, world hunger, and global economic disparity, this book is an essential reference source for doctors, bioethicists, human genome specialists, and scientists in the fields of genetics and genomics. This authored monograph contains chapters on topics ranging from agronomics and biotechnology to commercial genomics, genome sequencing, cancer genomics, and more.

The Deconstructed Church Gerardo Marti 2014-04-22 Winner of the Distinguished Book Award from the Society for the Scientific Study of Religion The Emerging Church Movement (ECM) is a creative, entrepreneurial religious movement that strives to achieve social legitimacy and spiritual vitality by actively disassociating from its roots in conservative, evangelical Christianity and "deconstructing" contemporary expressions of Christianity. Emerging Christians see themselves as overturning outdated interpretations of the Bible, transforming hierarchical religious institutions, and re-orienting Christianity to step outside the walls of church buildings toward working among and serving others in the "real world." Drawing on ethnographic observation of emerging congregations, pub churches, neo-monastic communities, conferences, online networks, in-depth interviews, and congregational surveys in the US, UK, and Ireland, Gerardo Marti and Gladys Ganiel provide a comprehensive social-scientific analysis of the development and significance of the ECM. Emerging Christians, they find, are shaping a distinct religious orientation that encourages individualism, deep relationships with others, new ideas about the nature of truth, doubt, and God, and innovations in preaching, worship, Eucharist, and leadership.

Finance for All? World Bank 2007-11-09 Access to financial services varies sharply around the world. In many developing countries less than half the population has an account with a financial institution, and in most of Africa less than one in five households do. Lack of access to finance is often the critical mechanism for generating persistent income inequality, as well as slower growth. 'Finance for All?: Policies and Pitfalls in Expanding Access' documents the extent of financial exclusion around the world; addresses the importance of access to financial services for growth, equity and poverty reduction; and discusses policy interventions and institutional reforms that can improve access for underserved groups. The report is a broad ranging review of the work already completed or in progress, drawing on research utilizing data at the country, firm and household level. Given that financial systems in many developing countries serve only a small part of the population, expanding access remains an important challenge across the world, leaving much for governments to do. However, not all government actions are equally effective and some policies can be counterproductive. The report sets out principles for effective government policy on broadening access, drawing on the available evidence and illustrating with examples.

Coronavirus Politics Scott L Greer 2021-04-19 COVID-19 is the most significant global crisis of any of our lifetimes. The numbers have been

stupefying, whether of infection and mortality, the scale of public health measures, or the economic consequences of shutdown. Coronavirus Politics identifies key threads in the global comparative discussion that continue to shed light on COVID-19 and shape debates about what it means for scholarship in health and comparative politics. Editors Scott L. Greer, Elizabeth J. King, Elize Massard da Fonseca, and André Peralta-Santos bring together over 30 authors versed in politics and the health issues in order to understand the health policy decisions, the public health interventions, the social policy decisions, their interactions, and the reasons. The book's coverage is global, with a wide range of key and exemplary countries, and contains a mixture of comparative, thematic, and templated country studies. All go beyond reporting and monitoring to develop explanations that draw on the authors' expertise while engaging in structured conversations across the book.
